Stetson University
Vehicle/Driver Safety Policy & Guidelines

Vehicle & Driver Safety Statement

The safety of our students, faculty, staff and the community is a central concern of Stetson University. As a driver, you have a responsibility to your passengers, the university, and to the general public with whom you share the highway. The following safety guidelines, governing the use of University owned, leased, or business related vehicles, are designed to support safe and prudent use of vehicles. It is the responsibility of all university approved drivers to review and adhere to these guidelines in order to support optimum safety while driving on behalf of the University.

Approved Drivers

In an effort to ensure that safe drivers will drive on behalf of the University, an “Approved Driver Policy” has been implemented which is described below, and can also be found under Section 4 / 4.27 of the Personnel Policies. To become a university approved driver, the appropriate prequalification forms should be completed and forwarded to Risk Management. (See “Forms” section: Auth for Release-MVR 1-10.doc and MVR-Dept Auth Form-Rev2-10.doc)

Approved Driver Policy 4.27

Stetson University recognizes that some university employees and students workers are required to drive a vehicle in the performance of their duties. Individuals who will drive a university owned, leased or rented vehicle or who will regularly drive their personal vehicle on behalf of the University, or transport students for university functions, are required to present a valid Florida driver’s license and will be subject to a background check of their motor vehicle driving records (MVR) initially and annually. Any information obtained is considered confidential and release of this information would be limited to our insurance agent(s) and will not be released to any other entities.

Only individuals with an acceptable driving record and a valid Florida driver’s license will be placed on the University Approved Driver List. All approved drivers must adhere to the University’s Vehicle/Driver Safety Policy & guidelines. Placement upon the University Approved Drivers List is only an indication of an acceptable driving record and does not provide automobile insurance coverage for personal vehicles used in performance of job responsibilities. Individuals who regularly use their personal vehicle for business travel on behalf of the university are those who receive mileage reimbursement which is intended to help offset the costs of fuel, wear-and-tear and personal automobile insurance coverage and whose job assignment includes such travel. Employees regularly using their personal vehicle for business travel should understand that their personal automobile insurance is the primary insurance coverage.

Job responsibilities and employment may be affected for those employees whose driving record is determined to be unacceptable according to the university’s automobile insurance carrier. This may include, but not be limited to, removal of driving responsibilities and/or termination of employment, if driving on university business is required on a regular basis.

University Driver Age Requirements

In addition to the requirements of the Approved Drivers Policy, drivers must also be at least 21 years of age and have at least 3 years of driving experience, OR must be at least age 19 with 2 years of driving experience if driving duties are on-campus only or within a 5 mile radius.
Driver Responsibilities & Vehicle Requirements

As a University driver, you have a responsibility to your passengers, the university, your vehicle, and to the general public with whom you share the highway. The following outlines those responsibilities. These guidelines were developed to enhance your safety and the safety of others. Failure to adhere to these guidelines could prove detrimental to that safety as well as to the university, and could impact your driving status and/or result in corrective action.

**Driver Responsibilities:**

Approved drivers must possess and maintain a valid drivers license and acceptable driving record whenever driving a University vehicle or when driving on behalf of the university.

Drivers must report any change in status of their driving record immediately to their supervisor and to Risk Management.

Drivers are responsible for adhering to the University’s Vehicle Safety Guidelines, Golf Cart Safety Guidelines and/or Van Safety Guidelines (if driving vans). (Guidelines Located at end of ‘Forms’ section)

Drivers must observe and obey all traffic regulations. Drivers are personally responsible for any traffic citations that may be issued as a result of improper vehicle operation.

Drivers and passengers shall wear seatbelts at all times.

Drivers shall be alcohol and drug free. This includes prescription and non-prescription drugs that may impair a driver’s judgment or driving ability. Towing, radar detectors and hitchhikers are prohibited.

Driving should be avoided when weather conditions are hazardous.

Cell phone use while driving inhibits driving abilities and increases distraction and risk. Avoid using cell phones while driving and if cell phone is necessary, utilize cell phone when vehicle is safely parked, or have a passenger assist. ‘Texting’, Email, or Internet use should NEVER be performed while driving!

Drivers should not drive more than 12 hours within a 24 hour period and should take regular breaks every 2 – 3 hours. If trip is longer than 12 hours, there should be an alternative driver, or overnight stay or flight travel should be considered as an alternative to driving. Vehicle travel between the hours of Midnight and 5 AM should be avoided.

Drivers should report any accidents as soon as possible to their supervisor and to Risk Management, and should follow the university Accident Reporting Guidelines. (See last page of this policy)

**Vehicle Requirements:**

**- Inspection and Maintenance**

Vehicles should be inspected on a regular basis for any defects or faulty equipment.

Vehicles that are not operating properly or have faulty equipment should not be utilized. Proper maintenance must be obtained to ensure all problems are alleviated.

All vehicles must be properly maintained to ensure all equipment is working properly and safely.

All maintenance / repair records should be kept on file.
Vehicle Requirements (Con’t)

**Rental Vehicles:**

Rental vehicles will be operated in accordance to the vehicle & van safety guidelines. *(See end of ‘Forms’ section)* Rental vehicles used for business purposes should only be driven by Approved Drivers and reservations should include the University’s name. In addition, rental vehicles should be reserved and paid for via the University Purchasing Dept. (822-8850) or by utilizing an authorized university credit card. Rental vehicles used for authorized University business will be covered under the University’s commercial auto insurance as the policy applies. Please note that the rental of 15 passenger vans is no longer authorized due to the high rollover and safety risks noted by NHTSA (National Highway Traffic Safety Administration).

Drivers should thoroughly inspect rental vehicles for damages prior to leaving the rental facility and obtain copies of rental paperwork that reflects any existing damages. Once the driver leaves the rental facility, any damages found upon return that were not previously noted are the responsibility of the renting party and corresponding university department. This would include damages up to the existing policy deductible (typically $500 - $1000). Departments utilizing rental vehicles should consider this exposure when planning travel budgets.

Should an accident occur while using a business rental vehicle, please follow the ‘Vehicle Accident Reporting Guidelines’ on Page 4 and report to the Risk Management office as soon as possible. The University accident/claims process will require a legible copy of the Rental Agreement and any police reports obtained. Any accidents or vehicle damage must also be reported to the Rental company. Please obtain a copy of this report as well.

**Personal & Leased Vehicles Used for Business:**

Individuals who regularly use their personal vehicle for university business travel are those whose job assignment includes such travel, and who receive mileage reimbursement or vehicle allowance which is intended to help offset the costs of fuel, wear-and-tear, and personal automobile insurance coverage. Drivers utilizing personal vehicles for business travel must complete all driver related orientation, training, and pre-qualification screens as would any other university driver. *(see Approved Driver Policy above)*

All vehicle inspection and maintenance procedures should be followed as previously noted above. Supervisors should ensure that business-use personal vehicles or leased vehicles are inspected semi-annually utilizing the vehicle inspection checklist. *(See ‘Forms’ Section)* Inspection may be done in-house with appropriate knowledge or may be done externally at an auto service agent. Problems should be addressed as soon as possible. Inspection documentation should be kept on file along with review of pertinent vehicle documentation such as registration, insurance, etc.

Personal vehicles, whether used for personal or business reasons, are covered by the driver / owner’s personal insurance policy obtained specifically for that vehicle, and is the primary insurance coverage for that vehicle. The University does not obtain auto policies for personal vehicles, however, in applicable cases the university’s commercial auto policy may provide excess liability coverage depending upon the circumstances of the incident.

Drivers who utilize personal vehicles on a regular daily or weekly basis for business purposes, where mileage reimbursement or vehicle allowance is applied, should supply proof of current auto insurance coverage, recommended to include Limits of Liability of at least: $100,000/ $300,000.
Vehicle Accident Reporting Guidelines:

Drivers should report all business related auto accidents to their supervisor and to Risk Management (386-822-7701) within 24 hours, or immediately if injuries result.

Drivers will cooperate fully with the accident investigation process.

If involved in an auto accident:

- Notify the proper authorities immediately and obtain a copy of the police report, or obtain information from the Officer needed to obtain the report.
- Whether or not an officer is in attendance, always exchange pertinent information with the “Other Driver” for insurance filing.
- Important Information to Obtain: Name, Address, Phone#, Auto Insurance Company, Insurance Company Policy#, Insurance Company Phone#, Vehicle Year, Make & Model & Witness/Passenger Info if any.
- Note: Date & Location of Accident, Name of Law Enforcement Agency (DPD, State Trooper, County Sheriff, etc) and any Damages.

Complete the University Vehicle Accident Report as soon as possible. (See ‘Forms’ section)

Supervisor Responsibilities:

If a business related auto accident is reported to you, notify Risk Management immediately (386-822-7701) and complete the Supervisor Accident Review Report. (See ‘Forms’ section)

Accident Investigation and Accountability

All vehicle accidents or incidents will be investigated and reviewed by the corresponding supervisor, risk management and/or the associated Director, VP or Dean. Recommended accident and driving record criteria will be followed to determine future driving acceptability and/or any corrective actions needed.

Corrective actions could include; written warning, driver training, probation, removal/suspension of driving responsibilities or termination of employment.

Accident and Driving Acceptability Criteria:

I. First preventable or at-fault accident within a three year period:
   - Verbal Warning and Review of Vehicle, Van and/or Golf Safety Guidelines

II. Two or more preventable or at-fault accidents within a three year period:
   - Written Warning with possible probation (3 – 12 months)
   - Require attendance of an appropriate/recommended Drivers Training Course
   - Possible suspension of driving responsibilities
   - Possible termination depending upon accident history severity & frequency, warnings, probation and/or if primary duties cannot be performed without driving for length of suspension

III. Major moving violations such as: Hit-and-run, DUI, Vehicular Felony Homicide/manslaughter, Reckless or Careless Driving and License Suspension – The following applies in addition to II. above:
   - Suspension of driving responsibilities and/or termination of employment if primary duties cannot be performed without driving for length of suspension.

FORMS
SECTION
Stetson University

MOTOR VEHICLE RECORD/ MVR
AUTHORIZATION FOR RELEASE OF INFORMATION

As standard procedure, and required by our auto insurance and liability carriers, all individuals who will drive a university owned, leased or rental vehicle, or who will drive on behalf of Stetson University to off campus locations on a regular basis, or transport students for university functions, must show proof of a valid drivers license and an acceptable driving record.

In order to obtain your motor vehicle record information, we request that you complete and sign this Authorization for Release of Information Form. This information is considered confidential and will be treated as such. The information obtained within your motor vehicle record is limited to our insurance agent(s) and will not be shared with other entities.

Only individuals with an acceptable driving record and a valid Florida driver’s license will be placed on the University Approved Driver List. All approved drivers must adhere to the University’s Vehicle/Driver Safety Policy & guidelines. Placement upon the University Approved Drivers List is only an indication of an acceptable driving record and does not provide automobile insurance coverage for personal vehicles used in performance of job responsibilities. Employees using their personal vehicle for business related travel should understand that their personal automobile insurance is always the primary insurance coverage. Individuals using their personal vehicle for business travel on behalf of the university on a ‘regular basis’ are those whose job assignment includes such travel, and who receive mileage reimbursement which is intended to help offset the costs of fuel, wear-and-tear and personal automobile insurance coverage.

After completion of this form, please return to the corresponding University Department for which you will be driving, or forward to the Risk Management/ Facilities Mgmt Bldg via Fax: 386-822-8873, or mail to Unit 8420.

Upon receipt of this form and the corresponding departmental approval form, please allow 1-3 days for the MVR process to be completed. You and your departmental contact/supervisor will be notified upon completion, and of approval status. Should you have any questions regarding the MVR process, please contact Risk Management at: 386-822-7701.

– Thank you.

SAFETY GUIDELINES SECTION
As a University driver, you have a responsibility to your passengers, the university, and to the general public with whom you share the highway. The safety of our students, faculty, staff and the community is a central concern of Stetson University. The following guidelines governing the use of University owned, leased, rented, or other work related vehicles are designed to support safe and prudent use of vehicles.

Please read the following information carefully. As an approved driver, you have a responsibility to review and adhere to the following guidelines.

Before leaving: Always inspect vehicle to make sure all equipment is working properly. Vehicles not operating properly should not be utilized until proper maintenance is obtained.

Driver Adjustments:

- Always wear seatbelts! – (Passengers Too)
- Always adjust your seat and mirrors for optimal view of angles prior to leaving (taking note of blind spots at sides and rear of vehicle.)
- If unfamiliar with the vehicle, locate important features & controls such as: lights, windshield wipers, air-conditioning & emergency signal controls are located.
- Secure any loose or miscellaneous items in the front driver area (ie. purses, cd’s, etc.)
- Pre-program radio stations or have front passenger control radio/cd’s/tapes.

Seatbelt Safety and Information:

- Only transport as many people as there are seatbelts
- The Driver and ALL passengers should be seated in recognized seats and must wear seat belts properly.
- Seatbelts reduce risk of death in rollover accidents by 75%!
- Failure to wear your seatbelt will reduce your work comp benefits.
- The Driver should make sure all passengers have seatbelts on before leaving.

Safety Tips While Driving:

- Drive defensively at all times - Be alert for unexpected actions, sudden stops and mistakes of others
- Observe and obey all traffic regulations, devices, road signs and warnings
- Drivers shall be alcohol and drug free. This includes prescription and non-prescription drugs that may impair a driver’s judgment or driving ability.
- Concentrate on driving at all times and maintain a safe speed- Consider weather & road conditions
- Avoid distractions such as eating, excessive radio volume, cell phones, searching/reaching for items, etc. Never Text or Email while driving!
- Slow down in busy areas such as city traffic, rush hour traffic, parking lots and residential areas
- Always keep alert for pedestrians, children, and smaller vehicles such as bikes & motorcycles
- Always allow a safe following distance – Consider weather & road conditions- Never Tailgate
Check Blind Spots frequently

- Especially when changing lanes & backing
- Change lanes slowly
- Back up slowly

Backing:

- **The greatest blind spot is to the rear when backing up.**
- Many accidents occur while backing out of parking areas.
- Your best defense is to back up only when necessary & avoid backing into traffic.
- As an added caution- use your emergency flashers while backing up & turn down radio

**Before backing up, make sure all is clear behind you – Do not rely solely on mirrors.**

**When in doubt – check it out: (G.O.A.L. – Get Out And Look!)**

- Back up slowly

Turning and Changing Lanes:

- Use turn signals well in advance
- Always watch for pedestrians, small vehicles, & motorcycles in intersections when turning

**When changing lanes- double check blind spots**

- Take it slow when turning or changing lanes

Intersection Safety:

- Scan ahead at least 1 block as you come upon intersections
- Before entering the intersection, scan left-right-left before entering
- Scan mirrors frequently
- Check for pedestrians and bikers entering the intersection area
- Do not assume anything….  
  - The person with blinker on may not turn
  - The pedestrian on corner may decide to run across intersection
  - The light may not change when you expect it to
  - The vehicle or bike in front of you may stop suddenly
- Cover the brake with your foot as you enter into the intersection (this helps reaction time if need to stop suddenly)

Parking and Loading/Unloading:

- **Use extra caution and drive slowly whenever driving through a parking lot or other congested areas.**
- Watch carefully for pedestrians and other vehicles pulling in and backing out
- If you are loading/unloading passengers or equipment, make sure you do so in the safest possible area.
- Avoid unloading passengers in areas where they would have to cross through traffic after exiting the vehicle.
- Always lock the vehicle when it is unattended
AVOID driving practices that lead to loss of control – Such As:

- Sharp Turns – (Take Corners and Exit Ramps slow and easy)
- Excessive Speed – (Note the speed limit and weather conditions)
- Abrupt Maneuvers (Change lanes slowly – do not jerk the wheel)
- Driving while fatigued (Change drivers or stop to rest every 2-3 hours)
- Driving during extreme windy, rainy or hazardous weather conditions
- Following too closely (at least a 4 second following distance - note road conditions)
- Sudden stops or panic stops – (look ahead & signal early - slow down gradually)

Avoid Rear-End Collisions – Look Ahead, Avoid Sudden Stops, and Never Tailgate

Reduce distractions:

- When possible, have a passenger assist with navigation and cell phone calls.
- **Texting and Emailing should never be performed while driving!**
- Avoid eating, excessive radio volume, or searching/reaching for items within car
- As added precaution, pull over to a safe place when needing to do the above activities

Rental Vehicles:

Make sure to note on the Rental Car Agreement “Stetson University” along with your name as the driver. Always keep your copy of the Rental Agreement as it may be needed later in event of an incident/damages.

Drivers should thoroughly inspect rental vehicles for damages prior to leaving the rental facility and obtain copies of rental paperwork that reflects any existing damages. Once the driver leaves the rental facility, any damages found upon return that were not previously noted are the responsibility of the renting party and corresponding university department. This would include damages up to the existing policy deductible (currently $500) Departments utilizing rental vehicles should consider this exposure when planning travel budgets, or plan on extra expense of obtaining the rental company’s vehicle Loss Damage Waiver (LDW), which provides payment for damages to rental vehicles.

Vehicle Damages/Reporting Accidents:

If any damages occur to a Stetson rental, leased or owned vehicle, the department utilizing the vehicle shall be responsible for the cost of damages up to the $500 auto deductible.

Drivers should report all business related auto accidents to their supervisor and to Risk Management: (386-822-7701) or tgordon@stetson.edu within 24 hours, or immediately if injuries result.

If involved in an auto accident:

- Notify the proper authorities immediately and obtain a copy of the police report, or obtain information from the Officer needed to obtain the report.
- Whether or not an officer is in attendance, always exchange pertinent information with the “Other Driver” for insurance filing. (Insurance Company Info, Name, phone, address, year/make/model of other vehicle, if any passenger or witness, etc
- Note: Date & Location of Accident, Name of Law Enforcement Agency (DPD, State Trooper, County Sheriff, etc) and any Damages.

Complete the University Vehicle Accident Report as soon as possible.

**Please Keep The Above Information For Your Reference**
I have thoroughly read and acknowledge the preceding information regarding vehicle safety guidelines, and understand the hazards, safety precautions & guidelines specified and agree to abide by them. I also understand that failure to adhere to the vehicle safety guidelines could be detrimental to my safety, the safety of others, and could impact my driving duties and/or result in corrective action.

Rev (7/13)
Driving a van is much different than driving a passenger car, and for many people it is a new experience. Vans are much larger in size and weight, and have much larger blind spots on each side and to the rear of the van. Their center of gravity can also shift more significantly, which can increase risk of rollover. Therefore, a van handles differently than a car and requires extra caution at all times. As a University van driver, you have a responsibility to your passengers, the university, and to the general public with whom you share the highway.

The following are some Van Safety Information Tips from the National Highway Traffic Safety Administration (NHTSA) that you should be aware of prior to driving a van. Please note that the rental of 15 passenger vans is no longer approved due to high rollover and safety risks.

Please read the following information carefully. It is the responsibility of all approved drivers to review and adhere to the following guidelines.

Before leaving: Always inspect van to make sure all equipment is working properly. Vans not operating properly should not be utilized until proper maintenance is obtained.

Load the van with care.

• Never overload the van with either equipment or people.
• Load vans as evenly as possible and spread out passenger load evenly.
• Luggage/equipment should be placed in the rear behind the last seat and secured.
• Avoid loading anything heavy or ill-fitted on the roof as this could shift the center of gravity to the top and increases rollover risk.

Driver Adjustments:

• Vans have larger blind spots to the sides and rear than a passenger car.
• Always adjust your seat and mirrors for optimal view of angles prior to leaving.
• If unfamiliar with the vehicle, take note where lights, windshield wipers, air-conditioning & emergency signal controls are located, as well as gas tank door.
• Secure any loose or miscellaneous items in the front driver area (ie. purses, cd’s, etc.)
• Pre-program radio stations or have front passenger control radio/cd’s/tapes.
• Always wear seatbelts!! – (Passengers Too!)

Seatbelt Safety and Information:

• Only transport as many people as there are seatbelts.
• The Driver and ALL passengers should be seated in recognized seats and must wear seat belts properly.
• Seatbelts reduce risk of death in rollover accidents by 75%!
• Failure to wear your seatbelt will reduce your work comp benefits.
• The Driver should make sure all passengers have seatbelts on before leaving.

Practice if Possible

• If unfamiliar with driving vans, it is recommended the driver take time to practice backing, turning and parking with the van in a safe and non-congested area such as an empty parking lot.
• Take note of turning capacity/ radius around curbs and the extra height of the van for parking in a parking garage.
Safety Tips While Driving:

1. Avoid driving practices that lead to loss of control – Such As:

   - Sharp Turns – (Take Corners and Exit Ramps slow and easy)
   - Excessive Speed – (Note the speed limit and weather conditions)
   - Abrupt Maneuvers (Change lanes slowly – do not jerk the wheel)
   - Driving while fatigued (Change drivers or stop to rest every 2 – 3 hours)
   - During extreme windy or hazardous weather conditions
   - Following too closely (at least a 4 second following distance)
   - Avoid Sudden stops or panic stops (Look ahead & signal early- slow down gradually)
   - Avoid distractions such as eating, excessive radio volume, cell phones, searching/reaching for items, etc. - Never text or Email while driving!!

2. Vans require a longer stopping distance! – Allow more time and distance between vehicles to compensate – Consider weather and road conditions – Avoid sudden stops and Never tailgate!

3. Check Blind Spots frequently – especially when changing lanes & backing
   - Change lanes slowly

4. Backing:
   - The greatest blind spot is to the rear when backing up.
   - Many accidents occur while backing out of parking areas.
   - Look to rear, sides and front of your vehicle in addition to using your mirrors
   - As an added caution- use your emergency flashers while backing up & turn down radio.
   Before backing up, make sure all is clear behind you! – Do not rely solely on mirrors. When in doubt – check it out: (G.O.A.L. –Get Out And Look!)
   - Back up slowly

5. Turning and Changing Lanes:
   - Use turn signals well in advance
   - When turning a corner, you must make a wider swing with a van than with a car
   - Always watch for pedestrians, small vehicles, & motorcycles in intersections when turning
   - When changing lanes- double check blindspots
   - Take it slow when turning or changing lanes

6. Intersection Safety:

   - Scan ahead at least 1 block as you come upon intersections
   - Before entering the intersection, scan left-right-left before entering
   - Scan mirrors frequently
   - Check for pedestrians and bikers entering the intersection area
   - Do not assume anything….
     - The person with blinker on may not turn
     - The pedestrian on corner may decide to run across intersection
     - The light may not change when you expect it to
     - The vehicle or bike in front of you may stop suddenly
   - Cover the brake with your foot as you enter into the intersection (this helps reaction time if need to stop suddenly)
7. **Parking and Loading/Unloading:**

- Use extra caution and drive *slowly* whenever driving through a parking lot or other congested areas.
- Watch carefully for pedestrians and other vehicles pulling in and backing out.
- If you are loading/unloading passengers or equipment, make sure you do so in the safest possible area.
- Avoid unloading passengers in areas where they would have to cross through traffic after exiting the vehicle.
- Always lock the van when it is unattended.

8. **If vehicle should go off roadway or wheel drop off pavement:**

- Avoid abrupt maneuvers (panic-like steering or overcorrecting).
- Gradually reduce vehicle speed.
- Ease vehicle back onto roadway.

9. **Reduce distractions:**

- Have a passenger assist with navigation, radio and cell phone calls.
- **NEVER** Text or Email while driving!!
- Pull over to a safe area if cell phone use or other involved activities are necessary.

---

**Important Info about 12 and 15 Passenger Vans**

As a general safety rule, due to the rollover risk, Stetson has a policy to refrain from using 15 passenger vans. Sometimes allowances have been made for the use of 12 passenger vans, because there is less weight in the back, but in many cases these are often 15 passenger vans with the rear seat removed, however, they still have a high center of gravity. The later models (2007 and over) are now required to include the new ESC (Electronic Stability Control) and most now have shoulder type seatbelts. Some have the advanced air bags and tire pressure monitoring systems, but you have to ask the rental company if their vans include it. Because there are still many older models in use out there, asking if the van is 2007 or newer is a good idea since these models are supposed to have some added safety features.

**IMPORTANT!!**

- If you are ever in an emergency position where you have no other choice but to rent a 15 passenger van, or you sometimes must rent a 12 passenger van, please review the precautions and safety tips on the website link below, as well as Stetson’s Van Safety Guidelines attached. (all drivers must read and sign)
- **Ask the rental company if their vans are at least 2007 or newer and if they include the new safety features noted above.**
- **Please also note the tire pressure precautions** in the Link below. This is important as 57% of rollover crashes resulted from improperly inflated back tires.
- **Note:** 15 & 12 passenger van specs for the tire pressure Psi is often different for the back tires than the front tires. The Van specs should be used for tires, **not** what is written on the tires. Van tire specs can be found on the Driver’s side doorjam or the manual.
- When renting, ask the rental company to double check that the tire Psi is correct and make sure the tire tread is not worn.

Van Safety Acknowledgement Quiz

True or False:

_______ Vans have larger blind spots than cars, specifically to the sides & rear.

_______ A van’s center of gravity can shift more significantly which can increase risk of rollover.

_______ If I overload the van with people, it's ok if they don’t have a seatbelt as long as they sit in the middle and can hang on to the seat in front.

_______ Seatbelts reduce the risk of death in rollover accidents by 75%

_______ The driver is responsible for making sure all seatbelts are on before departure

_______ When backing up the driver just needs to check all mirrors first

_______ The proper following distance is at least 4 seconds

_______ Tailgating is ok as long as the driver covers the brake at all times

_______ Many accidents occur while backing out of parking areas.

_______ Vans have the same stopping distance as cars

_______ Thorough vehicle inspections is a key way to avoid breakdowns, delays and accidents.

_______ Exceeding the passenger or gross vehicle weight rating of the van can increase risk of roll-over Accidents

Circle the correct answer:

Stacking baggage above seat level is not recommended because it:
   a. Restricts the driver’s view through the rear window.
   b. Adversely affects the vehicle’s center of gravity.
   c. Could injure passengers in the vehicle if the vehicle comes to a sudden stop.
   d. All of the above.

Which of the following will NOT help to reduce the risk of roll-over accidents?
   a. Scanning the roadway ahead for hazards
   b. Avoiding distractions
   c. Driving at a conservative speed, especially in curves and around corners
   d. Exceeding the gross vehicle weight rating of the van

Name ___________________________  Dept _________________________  Date: __________
I have thoroughly read and acknowledge the preceding information regarding van safety guidelines, and understand the hazards, safety precautions, and guidelines specified and agree to abide by them. I also understand that failure to adhere to the van safety guidelines could be detrimental to my safety, the safety of others, the university, and could impact my driving duties and/or result in corrective action.

(Rev. 7-13)
I. **Introduction:**

Golf carts have become a necessary transportation device for many departments and are used for many types of work purposes. In an effort to increase the safety of employees, students, and visitors, and to avoid situations that may cause injury or damages, the following Golf Cart Safety guidelines were developed.

II. **Purpose:**

The purpose of these guidelines is to ensure that golf cart operators are aware of the hazards that exist when operating a golf cart, and to prevent unnecessary damage or injuries that result from their misuse or lack of caution.

III. **Safety Guidelines:**

- Always **check behind the vehicle** before backing up. (Do not rely on mirrors, rear windows or memory- the situation behind you may have changed since you parked the cart)
- Secure any cargo or tools that have been loaded into the golf cart
- Back up slowly
- Remain seated and hold on while the vehicle is in motion. (wear seatbelts if provided)
- Warn passengers of any upcoming turns or bumps
- Drive only as fast as conditions allow - use caution during bad weather conditions
- Slow Down and use extreme caution during:
  - Turns
  - Blind corners
  - Parking lots, main roadways, and crowded areas
- Always give pedestrians the Right-of-Way
- Avoid squeezing thru narrow passages or tight spaces, especially in parking lots (when in doubt, take another route)
- Keep all limbs in the vehicle until it comes to a complete stop
- Watch for potholes, dips and uneven surfaces
- Be mindful of pedestrians and other vehicles at all times – especially in parking lots, crosswalks and main roadways
- Do not overload cart with passengers or cargo
- When parking, engage the parking brake – take keys with you
- Report any maintenance problems, such as brakes or leaks, to your departmental supervisor
- Discontinue use of golf cart if any safety systems are not working properly
- Report any accidents to Public Safety immediately and to your supervisor
- No horseplay – always drive safely
- **Texting should never be done while driving!** Pull over & stop if cell phone use is necessary
- Golf carts are to be used for University related business within the campus area vicinity
- When traveling along or across main roadways throughout the campus area, be extra cautious of the street vehicles around you, and utilize traffic light and designated crossings whenever possible. Push aside rain flaps for clearer view of oncoming traffic.

Golf Cart Safety Guidelines Acknowledgement

Employee Name: ______________________________  Phone: ________________
Department: _________________________________

By signing below I acknowledge that: (please check all that apply)

_____ I have read and understand the Golf Cart Safety Guidelines

_____ I understand the hazards associated with driving golf carts
   and agree to abide by the safety guidelines.

_____ I have been provided with the opportunity to ask questions
   related to these guidelines.

_____ I understand that failure to follow these guidelines
   could result in corrective action.
