

## **Standard photo sizes for WebGarage layouts**

### **Photo sizes are in pixels (px)**

**640x360:** Largest photo size used in WebGarage templates. Is available in single- and double-column layout options.

**640x200:** Currently available only in a multi-column layout featuring a main text area and 2 sidebar columns.

**640x100:** Most useful for banner-type graphics, although photos will work. Available in single- and double-column layouts.

**420x150:** Pairs with 200x150 photo at the top of the multi-column layout that features a text area and sidebar column.

**320x240:** Available in single-column and double-column layouts. Appears on the top right side of the page.

**200x150:** Used in groupings – 3 across the top, or 3 down the side - in single-column layouts, and 3 across the top in double-column layouts

**150x200:** Most useful for photos of people and on pages that require information grouped with specific, related photos. Available in three layout options: left side of the page, on the right side of the page, or on alternating sides (left-right, etc.). Note that each photo is paired with a text box in this layout option.
