

## Off Campus Virtual Lab Access Instructions

To access the Stetson University Virtual Lab from off campus, you will need to connect through a Virtual Private Network (VPN) connection. This will require a client called FortiClient installed on your device. Below are instructions on how to download and configure the client on your device.

The client can be downloaded and installed from the location below. https://www.fortinet.com/support/product-downloads#vpn

 Once the client is installed, will need to enter the client a new connection. On the New VPN Connection page select the icon with three lines on the right. Select "Add a new connection"

- 2) On the new screen that appears fill in the following information
  - a. In the Connection Name box enter VLab
  - b. In the Remote Gateway box enter vpn.stetson.edu/vlab
  - c. Enter a check in the Enable Single Sign On (SSO) for VPN Tunnel
  - d. Click on Save
