Demographics of Participating Institutions

Sixty three postsecondary institutions self-selected to participate in the Fall 2013 ACHA National College Health Assessment and 34,587 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only institutions located in the United States that surveyed all students or used a random sampling technique are included in the analysis, yielding a final data set consisting of 32,964 students at 57 schools. Demographic characteristics of the 57 campuses follow:
