

“At Stetson, we take pride in offering continuing legal education programs that exceed expectations. Our CLE curriculum, year after year, focuses on the cutting-edge legal issues practicing attorneys need and want to learn about.

In the coming year, we plan to offer several programs, covering topics from advocacy in mediation to health law, along with our annual favorites like special needs trusts, bankruptcy, and law and higher education. We recently traveled out of state to Fort Worth, Texas and co-sponsored a successful Special Needs Trusts program with Texas Wesleyan University School of Law.

Our office often works together with the Centers for Elder Law, Advocacy and Health Law at Stetson, and is continually growing and constantly striving to successfully move into the future and keep the legal community and other professionals informed about the rapid changes happening in all facets of the law.”
