

The Department of Chemistry and Biochemistry

The Department of Chemistry and Biochemistry strives to create a learning environment that supports diversity of thoughts, capabilities, and perspectives. Everyone has a life filled with different challenges and experiences. The faculty in the department appreciate this and embrace the diversity of our students. We are appreciative of, and respect the identities of, all of our students irrespective of their background including, but not limited to, race, ethnicity, nationality, gender, gender identification, socio-economic class, sexuality, religion, age, and ability. As faculty, we will treat you, our students, with respect and we expect you to treat us and others with the same respect. Just as we are here to provide an equitable learning experience, you, the student, must do your part to support a learning environment that creates a space that is respectful of all, including, but not limited to, Black, LatinX, LGBTQ+, Asian, Indigenous, and white people regardless of their race, ethnicity, nationality, gender, gender identification, socio-economic class, sexuality, religion, age, ability etc.
