Dear Model U.S. Senator: 20 March 2025

It is our pleasure to welcome you to the 53nd Annual Patrick L. Smith Model United States Senate at Stetson University. For five decades, thousands of students from across the nation have gathered at Stetson for three days to debate the important issues of the time. Today, we continue this honored tradition.

We are excited about the possibilities for the 53nd Senate. Students from Bridgewater State College, Embry-Riddle Aeronautical University, Florida Southern College, Goucher College, Santa Fe State College, the University of Florida, Valdosta State University, Daytona State College, and Jacksonville University have traveled to Stetson University to participate in this three-day event. The legislation for this year is both substantive and challenging. In addition, each committee will have a special look at a particular issue during the Saturday hearings with expert witnesses.

As part of this year's event, we are honored to welcome current United States Congressman, Mike Haridopolos. Haridopolos served as a senator for the Florida State Senate from 2003-2010, and as the Florida Senate President from 2010-2012. Afterwhich, Haridopolos opened a lobbying firm, and in 2019 co-wrote the book *The Modern Political Party in Florida.* In 2024, Haridopolos became a representative for the 119th Congress. Currently, Haridoplos sits on the Committee on Science, Space, and Technology, Financial Services Committee, and the Republican Study Committee, along with this he is the chairman for the Space and Aeronautics Subcommittee.

The United States Senate is an institution of debate and civility. In the spirit of the Senate, we challenge you to thoroughly investigate the issues before your committee and debate differences vigorously. Nevertheless, we must always conduct ourselves with the utmost civility for each other.

We look forward to participating in this 53nd Model Senate and meeting you personally. Please feel free to contact us at any time with any questions or concerns.

Model U.S. Senate Handbook

It has been the continued goal of the Model U.S. Senate to structure a program that will be educational, stimulating, and enjoyable. With these goals in mind, it is *expected that Model U.S. Senators will portray the voting record and personality of their respective Senators*. This handbook contains some of the basic guidelines and other aids to assist in these portrayals. Please read it and consult it as the need arises. Detailed Senate Procedure Manuals are also available on the U.S. Senate website as well as upon request with the Model U.S. Senate Parliamentarian.

On behalf of the organizers of the Patrick L. Smith Model United States Senate, we thank you for your interest and participation in this most unique learning experience. We are confident that this will be a successful program in the spirit of the United States Senate.

Committee Meeting Procedure

1. The Chair of each committee has already been selected on the basis of role portrayal and experience in the P.L.S. Model U.S. Senate.

2. In the absence of a Model U.S. Senator, the Chairman or the Ranking Minority Member may cast a “proxy vote” on behalf of that Senator.

3. Bills should be read and ranked in order of priority, and that ranking should be followed for discussion.

4. As bills are discussed, revised and amended, they must be reported out of committee either favorably or unfavorably. An unfavorable report kills the bill, and it will not appear on the calendar. Bills, in the form they are to be introduced, are to be filed with the Clerk. The majority and minority leaders and the Clerk will then place each bill on the agenda for the Senate session.

5. The use of committee witnesses is an important facet of committee procedure. Experts in various fields will testify on specific proposed legislation. Question them carefully and completely, as they have been selected for their knowledge in the committee’s area.

6. It is suggested that for efficiency and effectiveness the committee agree to use Senate Rules of Procedure throughout their meetings. However, that decision is solely the Chair’s and the decision is final.

Useful Definitions

Act	Legislation that has passed both chambers of Congress in identical form, been signed into law by the President, or passed over his veto, thus becoming law. Technically, this term also refers to a bill that has been passed by one house and engrossed (prepared as an official copy).
Adjourn	A motion to adjourn in the Committee or Senate ends that day's session.
Adjournment Sine Die	The end of a legislative session "without day." These adjournments are used to indicate the final adjournment of an annual or two-year session of a Congress
Adjournment to a Day and Time Certain	An adjournment of the Senate that fixes the day and time for its next session.
Amendment	A proposal to alter the text of a pending bill or other measure by striking out some of it, by inserting new language, or both. Before an amendment becomes part of the measure, the Senate must agree to it.
Bill	The principal vehicle employed by lawmakers for introducing their proposals (enacting or repealing laws, for example) in the Senate. They address either matters of general interest ("public bills") or narrow interest ("private bills"), such as immigration cases and individual claims against the Federal government.
Caucus	From the Algonquian Indian language, a caucus means "to meet together." A caucus is an informal organization of Members of the House or the Senate, or both, that exists to discuss issues of mutual concern and possibly to perform legislative research and policy planning for its members.
Christmas Tree Bill	Informal nomenclature for a bill on the Senate floor that attracts many, often unrelated, floor amendments. The amendments that adorn the bill may provide special benefits to various groups or interests.
Cloture	The only procedure by which the Senate can vote to place a time limit on consideration of a bill or other matter, and thereby overcome a filibuster. Under the cloture rule (Rule XXII), the Senate may limit consideration of a pending matter to 30 additional hours, but only by vote of three-fifths of the full Senate, normally 60 votes.
Companion Bill or Measure	Similar or identical legislation that is introduced in the Senate and House. House and Senate lawmakers who share similar views on legislation may introduce a companion bill in their respective chambers to promote simultaneous consideration of the measure.
Consideration	To "call up" or "lay down" a bill or other measure on the Senate floor is to place it before the full Senate for consideration, including debate, amendment, and voting. Measures normally come before the Senate for consideration by the Majority Leader requesting unanimous consent that the Senate take it up.
Filibuster	Informal term for any attempt to block or delay Senate action on a bill or other matter by debating it at length, by offering numerous procedural motions, or by any other delaying or obstructive actions.
Floor Amendment	An amendment offered by an individual Senator from the floor during consideration of a bill or other measure, in contrast to a committee amendment.
Germane	On the subject of the pending bill or other business; a strict standard of relevance.
Motion to Proceed to Consider	A motion, usually offered by the Majority Leader to bring a bill or other measure up for consideration. This is the usual way of bringing a measure to the floor when unanimous consent cannot be obtained. For legislative business, the motion is debatable under most circumstances, and therefore may be subject to filibuster.
Point of Order	A claim made by a Senator from the floor that a rule of the Senate is being violated. If the Chair sustains the point of order, the action in violation of the rule is not permitted.
President	A constitutionally recognized officer of the Senate who presides over the chamber in the absence of the

Pro Tempore	Vice President. The President Pro Tempore (or, "president for a time") is elected by the Senate and is, by custom, the Senator of the majority party with the longest record of continuous service.
Quorum	The number of Senators that must be present for the Senate to do business. The Constitution requires a majority of Senators (51) for a quorum. Often, fewer Senators are actually present on the floor, but the Senate presumes that a quorum is present unless the contrary is shown by a roll call vote or quorum call.
Recess	A temporary interruption of the Senate's or Committee's business. Generally, the Senate recesses (rather than adjourns) at the end of each calendar day
Rider	Informal term for a non-germane amendment to a bill or an amendment to an appropriation bill that changes the permanent law governing a program funded by the bill.
Table, Motion to	A Senator may move to table any pending question. The motion is not debatable, and agreement to the motion is equivalent to defeating the question tabled. The motion is used to dispose quickly of questions the Senate does not wish to consider further.
Unanimous Consent	A Senator may request unanimous consent on the floor to set aside a specified rule of procedure so as to expedite proceedings. If no Senator objects, the Senate permits the action; however, if any one Senator objects, the request is rejected. Unanimous consent requests with only immediate effects are routinely granted, but ones affecting the floor schedule, the conditions of considering a bill or other business, or the rights of other Senators, are normally not offered, or a floor leader will object to it, until all Senators concerned have had an opportunity to inform the leaders that they find it acceptable.
Unanimous Consent Agreement	A unanimous consent request setting terms for the consideration of a specified bill or other measure. These agreements are usually proposed by the Majority Leader or floor manager of the measure, and reflect negotiations among Senators interested in the measure. Many are "time agreements," which limit the time available for debate and specify who will control that time. Many also permit only a list of specified amendments, or require amendments to be to the measure. A unanimous consent agreement may also contain other provisions, such as empowering the Majority Leader to call up the measure at will or specifying when consideration will begin or end.
Vice President	Under the Constitution, the Vice President serves as President of the Senate. The Vice President may vote in the Senate in the case of a tie, but is not required to. The President Pro Tempore (and others designated by him) usually perform these duties during the Vice President's frequent absences from the Senate.
Yield	When a Senator who has been recognized to speak "yields" to another, he or she permits the other to speak while the first Senator retains the floor. Technically, a Senator may yield to another only for a question.
Yield the Floor	A Senator who has been recognized to speak yields the floor when he or she completes his or her remarks and terminates his or her recognition.

Standard Rules of the Model U.S. Senate

The following oath of affirmation required by the Constitution and prescribed by law shall be taken and subscribed to by each Senator in open Senate before entering upon his duties.

> "I,_____, do solemnly swear that I will support and defend the Constitution of the United States against all enemies, foreign and domestic; that I will bear true faith and allegiance to the same; that I will take this obligation freely, without any mental reservation or purpose of evasion; and that I will well and faithfully discharge the duties of the office on which I am about to enter; so help me God."

A quorum shall consist of a majority of the Senators duly chosen and sworn in. If, at any time during the daily sessions, a question shall be raised by any Senator as to the presence of a quorum, the Presiding Officer shall direct the Secretary to call the roll and shall announce the result, and these proceedings shall be without debate.

The Presiding Officer having taken the chair, and a quorum being present, the Journal of the preceding day shall be read and any errors corrected. The proceedings of the Senate shall be briefly and accurately stated in the Journal, including messages from the President, titles of bills and resolutions, every vote, and a brief statement of the contents of each petition, memorial or paper presented to the Senate.

A question of order may be raised at any stage if no Senator has the floor, Senate not divided. Unless submitted to the Senate, the Presiding Officer shall decide all such questions without debate, subject to an appeal to the Senate. The Presiding Officer may submit any question of order for the decision of the Senate. An affirmative majority vote is required for passage.

The Presiding Officer shall enforce order whenever demonstration or confusion in the chamber or gallery calls for it. He may do so on his own initiative, without any point of order being made by a Senator.

Cloture may be invoked upon any measure or matter by the presentation to the Clerk of the Senate of a motion with the signatures of 16 Senators. After a valid cloture petition has been filed, it must lay on the table for 15 minutes, after which the clerk will call the roll for a vote. An affirmative vote of 3/5 (60) of those Senators chosen and sworn is required for passage. If cloture has been agreed to, ten (10) minutes of debate time on the pending matter remain. All Senators who have not spoken on the question will be permitted one minute for debate.

To be recognized to speak, a Senator should stand and say "Mr. President." The chair will recognize the first senator to seek recognition, with the understanding that the Majority Leader will always be recognized first. No Senator shall interrupt another Senator without his/her consent.

Senator A: "Mr. President, will the Senator yield?"

Chair: "Will the Senator yield?"

Senator B: "Yes."

Senator A then proceeds to speak if the Senator speaking yields. If Senator B refuses to yield with an answer of "no," Senator A must return to his seat.

A Senator may avoid interruptions by telling the Presiding Officer that he/she will yield to questions after he/she is finished speaking.

Except for the Majority and Minority Leaders, no Senator shall speak twice upon any new question in debate on the same day, except by permission of the Senate that shall be determined by a vote without debate.

All motions or resolutions may be withdrawn or modified by the mover at any time before the decision, amendment, or ordering of the yeas and nays. This does not apply to a motion to reconsider, which shall not be withdrawn without leave.

No Senator shall refer offensively to any State of the Union.

No Senator in debate shall, directly or indirectly, speak of another Senator or his conduct in a manner unworthy or unbecoming a Senator.

Any Senator who, in the opinion of the Presiding Officer, transgresses the rules of the Senate, shall be called to order by a motion of the Chair or another Senator. Any Senator called to order may appeal the ruling of the Chair, which shall be open to debate.

Withdraw a Motion	"I request permission to withdraw my motion."	No	No	No	No	Chair

Notes:

1. There are no such things as “friendly amendments.” Any amendment to a motion must be offered as a motion to amend.
2. The motion to refer to a committee can be amended regarding which committee and notes to the committee.
3. The motion to lay on the table is only in order if there is other urgent business. Instead use move to postpone either indefinitely to until a certain time, or refer to a committee.
4. Typically a call for division is simply granted. If there is an objection, the majority decides.
5. Reconsideration may only be moved by someone who voted with the prevailing side, and is debatable if the original motion was debatable.
6. Usually, the maker of a motion may withdraw it by unanimous consent, but if there is an objection, there must be a vote.

The Legislative Process on the Senate Floor: An Introduction

Summary

The standing rules of the Senate promote deliberation by permitting Senators to debate at length and by precluding a simple majority from ending debate when they are prepared to vote to approve a bill. This right of extended debate permits filibusters that can be brought to an end if the Senate invokes cloture, usually by a vote of three-fifths of all Senators. Even then, consideration can typically continue under cloture for an additional 30 hours. The possibility of filibusters encourages the Senate to seek consensus whenever possible and to conduct business under the terms of unanimous consent agreements that limit the time available for debate and amending.

Except when the Senate has invoked cloture or is considering appropriations, budget, and certain other measures, Senators also may propose floor amendments that are not germane to the subject or purpose of the bill being debated. This permits individual Senators to raise issues and potentially have the Senate vote on them, even if they have not been studied and evaluated by the relevant standing committees.

These characteristics of Senate rules make the Senate's daily floor schedule potentially unpredictable unless all Senators agree by unanimous consent to accept limits on their right to debate and offer non-germane amendments to a bill. Also to promote predictability and order, Senators traditionally have agreed to give certain procedural privileges to the majority leader. The majority leader enjoys priority in being recognized to speak, and only the majority leader (or a Senator acting at his behest) is able to successfully propose what bills and resolutions the Senate should consider.

Thus, the legislative process on the Senate floor reflects a balance between the rights guaranteed to Senators under the standing rules and the willingness of Senators to forego exercising some of these rights in order to expedite the conduct of business.

The Legislative Process on the Senate Floor: An Introduction

Introduction

The legislative process on the Senate floor is governed by a set of standing rules, a body of precedents created by rulings of presiding officers or by votes of the Senate, a variety of established and customary practices, and ad hoc arrangements the Senate makes to meet specific parliamentary and political circumstances. A knowledge of the Senate's formal rules is not sufficient to understand

Senate procedures, and Senate practices cannot be understood without knowing the rules to which the practices relate.

The essential characteristic of the Senate's rules, and the characteristic that most clearly distinguishes its procedures from those of the House of Representatives, is their emphasis on the rights and prerogatives of individual Senators. Like any legislative institution, the Senate is both a deliberative and a decision-making body; its procedures must embody some balance between the opportunity to deliberate or debate and the need to decide. The Senate's rules give greater weight to the value of full and free deliberation than they give to the value of expeditious decisions. Put differently, legislative rules also must strike a balance between minority rights and majority prerogatives. The Senate's standing rules place greater emphasis on the rights of individual Senators—and, therefore, of minorities within the Senate—than on the powers of the majority. The Senate's legislative agenda and its policy decisions are influenced not merely by the preferences of its Members but also by the intensity of their preferences.

Precisely because of the nature of its standing rules, the Senate cannot rely on them exclusively. If all Senators took full advantage of their rights under the rules whenever it might be in their immediate interests, the Senate would have great difficulty reaching timely decisions. Therefore, the Senate has developed a variety of practices by which Senators set aside some of their prerogatives under the rules to expedite the conduct of its business or to accommodate the needs and interests of its Members. Some of these practices have become well-established by precedent; others are arranged to suit the particular circumstances the Senate confronts from day to day and from issue to issue. In most cases, these alternative arrangements require the unanimous consent of the Senate—the explicit or implicit concurrence of each of the 100 Senators. The Senate relies on unanimous consent agreements every day for many purposes—purposes great and small, important and routine. However, Senators can protect their rights under Senate rules simply by objecting to a unanimous consent request to waive one or more of the rules.

Generally, the Senate can act more efficiently and expeditiously when its Members agree by unanimous consent to operate outside of its standing rules. Generally also, Senators insist that the rules be enforced strictly only when the questions before them are divisive and controversial. Compromise and accommodation normally prevail. Senators frequently exercise self-restraint by not taking full advantage of their rights and opportunities under the standing rules, and often by agreeing to unanimous consent requests for arrangements that may not promote their individual legislative interests. The standing rules remain available, however, for Senators to invoke when, in their judgment, the costs of compromise and accommodation become too great.

Thus, the legislative procedures on the Senate floor reflect a balance—and sometimes an uneasy balance—between the operation of its rules and the principles they embody, on the one hand, and pragmatic arrangements to expedite the conduct of business, on the other. The interplay between the principles of the Senate's standing rules and the pragmatism of its daily practices will be a theme running throughout the following sections of this report.

The Right to Debate

The standing rule that is probably most pivotal for shaping what does and does not occur on the Senate floor is paragraph 1(a) of Rule XIX, which governs debate:

> When a Senator desires to speak, he shall rise and address the Presiding Officer, and shall not proceed until he is recognized, and *the Presiding Officer shall recognize the Senator who shall first address him*. No Senator shall interrupt another Senator in debate without his consent, and to obtain such consent he shall first address the Presiding Officer, and no Senator shall speak more than twice upon any one question in debate on the same legislative day without leave of the Senate, which shall be determined without debate. (Emphasis added.)

The presiding officer of the Senate (unlike the Speaker of the House) may not use the power to recognize only certain Senators in order to control the flow of business. If no Senator holds the floor, any Senator seeking recognition has a right to be recognized. Moreover, once a Senator has been recognized, he or she may make any motion that Senate rules permit, including motions affecting what bills the Senate will consider (though a Senator loses the floor when he or she makes a motion, offers an amendment, or takes one of many other actions). In practice, however, the Senate has modified the effect of this rule by precedent and custom. By precedent, the majority and minority leaders are recognized first if the leader and another Senator are seeking recognition at the same time. In addition, by custom, only the majority leader (or another Senator acting at his behest) typically makes motions or requests affecting when the Senate will meet and what legislation it will consider.

In these respects, Senators relinquish their equal right to recognition and their right to make certain motions, and they do so in order to lend some order and predictability to the Senate's proceedings. Otherwise, it would be nearly impossible for any Senator to predict with assurance when the Senate will be in session and what legislation it will consider. For example, during debate on one bill, any Senator could move that the Senate turn to another bill instead. This would make it very difficult for the Senate to conduct its business in an orderly fashion, and it would be equally difficult for Senators to plan their own schedules with any confidence. Thus, Senate precedents and practices modify the operation of this rule, as it affects recognition, in the interests of the Senate as an institution and in the interests of its Members individually.

Even more important is what paragraph 1(a) of Rule XIX says and does not say about the length of debate. The rule imposes a limit of two speeches per Senator per question per legislative day (though Senators rarely insist on imposing this limit on their colleagues). Beyond this restriction, it imposes no limit at all on the number of Senators who may make those two speeches or on the length of the speeches. In fact, there are few Senate rules that limit the right to debate, and no rules that permit a simple majority of the Senate to end a debate whenever it is ready to vote for a bill, amendment, or most other questions being considered. When Senators are recognized by the presiding officer, the rules normally permit them to speak for as long as they wish, and questions generally cannot be put to a vote so long as there are Senators who still wish to make the speeches they are permitted to make under Rule XIX.

The House of Representatives may bring a question to a vote if a simple majority agrees to a motion to order the previous question. When meeting in Committee of the Whole, a majority of Representatives also can move to close debate on a pending amendment or sometimes on a bill and all amendments to it. No such motions are possible in the Senate. As a result, a majority of Senators does

not have nearly the same control over the pace and timing of their deliberations as does a majority of the House.

There is one partial exception to this generalization. The Senate often disposes of an amendment by agreeing to a motion to lay the amendment on the table. When a Senator who has been recognized makes this motion, it cannot be debated (except by unanimous consent, of course). If the Senate agrees to this motion to table, the amendment is rejected; to table is to kill. On the other hand, if the Senate defeats the motion, debate on the amendment may resume; the Senate only has determined that it is not prepared at that time to reject the amendment. Thus, a tabling motion can be used by a simple majority to stop debate even if there still are Senators wishing to speak, but only by defeating the amendment at issue. Although the effect of the motion is essentially negative, it frequently is a test vote on Senate support for an amendment. If the motion fails, the Senate may agree to the amendment shortly thereafter. But this is a reflection of political reality, not a requirement of Senate rules or precedents.

Filibusters and Cloture

The dearth of debate limitations in Senate rules creates the possibility of filibusters. Individual Senators or minority groups of Senators who adamantly oppose a bill or amendment may speak against it at great length (or threaten to), in the hope of changing their colleagues' minds, winning support for amendments that address their objections, or convincing the Senate to withdraw the bill or amendment from further consideration on the floor. Opposing Senators also can delay final floor action by offering numerous amendments and motions, demanding roll call votes on amendments and motions, and by using a variety of other devices.

The only formal procedure that Senate rules provide for breaking filibusters is to invoke cloture under the provisions of Rule XXII (commonly called the "cloture rule"). Under the rules, however, once cloture is proposed, the cloture vote cannot occur until after a further period of time (typically two days of Senate session); further, a simple majority of the Senate is insufficient to invoke cloture (except in very limited circumstances).

Cloture requires the support of three-fifths of the Senators duly chosen and sworn, or a minimum of 60 votes if there is no more than one vacancy. (If the matter being considered changes the standing rules, cloture requires a vote of two-thirds of the Senators present and voting. Pursuant to precedents set in 2013 and 2017, cloture can be invoked by a simple majority on any nomination.) For this reason alone, cloture can be difficult to invoke and almost always requires some bipartisan support. In addition, some Senators are reluctant to vote for cloture, even if they support the legislation being jeopardized by the filibuster, precisely because the right of extended debate is such an integral element of Senate history and procedure.

Even if the Senate does invoke cloture on a bill, the result is not an immediate vote on passing the bill. The cloture rule permits a maximum of 30 additional hours for considering the bill, during which each Senator may speak for one hour. (On a limited number of motions, Rule XXII does not permit additional consideration after cloture has been invoked; in those cases, the Senate proceeds to an

immediate vote on the motion in question. In addition, pursuant to an April 3, 2019, precedent, post-cloture consideration of most nominations is limited to two hours.) The time consumed by rollcall votes and quorum calls is deducted from the 30-hour total; as a result, each Senator does not have an opportunity to speak for a full hour, although he or she is guaranteed at least 10 minutes for debate. Thus, cloture does not typically stop debate immediately; it only ensures that debate cannot continue indefinitely. Even the additional 30 hours allowed on a bill under cloture is quite a long time for the Senate to devote to any one bill, especially since Senators may not be willing to invoke cloture until the bill already has been debated at considerable length.

Restraint and Delay

Any Senator can filibuster almost any legislative proposal that the Senate is considering. The only bills that cannot be filibustered are the relatively few which are considered under provisions of law that limit the time available for debating them. For example, Section 305(b)(1) of the Budget Act of 1974 restricts debate on a budget resolution, "and all amendments thereto and debatable motions and appeals in connection therewith," to not more than 50 hours. If no such provision applies, Senators can prolong the debate indefinitely on any bill or amendment (or nomination or treaty), as well as on many motions, subject only to tabling motions or to a successful cloture process.

Although there may be many matters to which some Senators may be adamantly opposed, filibusters are not daily events. One reason is that conducting a filibuster may be physically demanding (at least if it is not supported by a number of other Senators), but there are more compelling reasons for self-restraint. If Senators filibustered every bill they opposed, the Senate as an institution would suffer. It could not meet its constitutional responsibilities in a timely fashion and it could not respond effectively to pressing national needs. Public support for the Senate as an institution, and for its Members as individuals, would be undermined. Furthermore, all Senators have legislation they want to promote. They appreciate that if they used the filibuster regularly against bills they oppose, other Senators would be likely to do the same, and every Senator's legislative objectives would be jeopardized. In short, Senators typically have resorted to filibusters only on matters of pronounced significance to them because this practice serves the long-term interests of the Senate and all Senators alike.

Nonetheless, the right to debate at length remains, and the possibility of filibusters affects much of what happens on the Senate floor. Many of the ways in which the Senate agrees to set aside its standing rules are designed in response to the possibility of filibusters. Simply threatening to filibuster can give Senators great influence over whether the Senate considers a bill, when it considers it, and how it may be amended.

If a majority of Senators support a bill that is being filibustered, they may be able to pass it eventually if they are committed and patient enough—and especially if they are able to invoke cloture. Even if cloture is not invoked, devices such as late-night sessions may strain the endurance and determination of a filibustering Senator (though, in most circumstances, the burden imposed by such sessions is borne more by those supporting an end to debate, and in any case, requires the use of considerable floor time). The potency of filibusters does not depend, however, solely on Senators' ability to

prolong the debate indefinitely. From the right to debate flows the ability to delay, and the prospect of delay alone can often be sufficient to influence the Senate's agenda and decisions.

The legislative process is laborious and time-consuming, and the time available for Senate floor action each year is limited. Every day devoted to one bill is a day denied for consideration of other legislation, and there are not enough days to act on all the bills that Senators and Senate committees wish to see enacted. Naturally, the time pressures become even greater with the approach of deadlines such as the date for adjournment and the end of the fiscal year. So, for all but the most important bills, even the threat of a filibuster can provide significant leverage to Senators. Before a bill reaches the floor or while it is being debated, its supporters often seek ways to accommodate the concerns of opponents, preferring an amended bill that can be passed without protracted debate to the time, effort, and risks involved in confronting a filibuster or the threat of one.

Scheduling Legislative Business

Routine Agenda Setting

One way in which the possibility of extended debate affects the Senate's procedures is in how the Senate determines its legislative agenda—the order in which it decides to consider bills and other business on the floor. When a Senate standing committee reports a bill back to the Senate for floor debate and passage, the bill is placed on the Senate's Calendar of Business (under the heading of "General Orders").

The Senate gives its majority leader the primary responsibility for proposing the order in which bills on the calendar should come to the floor for action. The majority leader's right to preferential recognition already has been mentioned, as has Senators' general willingness to relinquish to him the right to make the motion (provided for in the standing rules) for deciding the order of legislative business—namely, the motion that the Senate proceed to the consideration of a particular bill.

Whenever possible, however, bills reach the Senate floor not by motion but by unanimous consent. Under the Senate standing rules, the motion to proceed to a bill usually is debatable and, therefore, subject to a filibuster. (The question of proceeding to certain matters—for example, to a conference report or to executive session to take up and consider a nomination on the calendar— is not, however, subject to a filibuster, though the matter itself is.) Even before the bill can reach the floor (and perhaps face a filibuster), there may be extended debate on the question of whether the Senate should even consider the bill at all.

To avoid this possibility, the majority leader attempts to get all Senators to agree by unanimous consent to take up the bill he wishes to have debated. If Senators withhold their consent, they are implicitly threatening extended debate on the question of considering the bill. Senators may do so because they oppose that bill or because they wish to delay consideration of one measure in the hope of influencing the fate of some other, possibly unrelated, measure. Senators can even place a "hold" on a bill, by which they ask their party's floor leader to object on their behalf to any unanimous consent request to consider the bill, at least until they have been consulted. The practice of holds is not

recognized in Senate standing rules or precedents (though both a provision in public law and a recently adopted Senate standing order govern their use); more often than not, however, the majority leader will not even make such a unanimous consent request if there is a hold on a bill.

In attempting to devise a schedule for the Senate floor, the majority leader seeks to promote the legislative program of his party (and perhaps the President) as he also tries to ensure that the Senate considers necessary legislation in a timely fashion.

When the majority leader is confronted with two bills, one of which can be brought up by unanimous consent and the other of which cannot, he is naturally inclined to ask the Senate to take up the bill that can be considered without objection. Time is limited, and the majority leader is concerned to use that time with reasonable efficiency. Some bills, of course, are too important to be delayed only because some Senators object to considering them. Most are not, however, especially if the objections can be met through negotiation and compromise. Thus, the possibility of extended debate affects decisions for scheduling legislation in two ways: by discouraging the majority leader and the Senate from attempting to take up bills to which some Senators object, and by encouraging negotiations over substantive changes in the bills in order to meet these objections.

The right of Senators to debate at length is not the only way in which they can influence the Senate's legislative agenda. The standing rules of the Senate give its Members at least two other opportunities to influence the matters that reach the Senate floor for debate and decision. One opportunity affects the prerogatives of Senate committees; the other affects the amendments that Senators may propose on the floor.

Committee Referral and Rule XIV

The Senate's standing committees play an essential part in the legislative process, as they select the small percentage of the bills introduced each Congress that, in their judgment, deserve the attention of the Senate as a whole, and as they recommend amendments to these bills based on their expert knowledge and experience. Most bills are routinely referred to the committee with appropriate jurisdiction as soon as they are introduced. However, paragraph 4 of Rule XIV permits a Senator to bypass a committee referral and have the bill placed directly on the Calendar of Business, with exactly the same formal status the bill would have if it had been considered and reported by a Senate committee.

By the same token, if a committee fails to act on a bill that was referred to it, while this may mean the bill will die for lack of action, the proposal it embodies may not. The Senator sponsoring the bill may introduce a new bill with exactly the same provisions as the first, and have the second bill placed directly on the calendar. However, taking the bill off the calendar (via unanimous consent or a motion to proceed) remains a question the Senate expects the majority leader to propose; thus, a Senator who uses Rule XIV to bypass a committee is not in a position to ensure the bill's movement to the floor. In recent practice, the majority leader more frequently uses this method to put a measure directly on the calendar—often to expedite consideration of a complicated or high-profile bill that has been drafted

outside of the committee process or in relation to a legislative vehicle that closely resembles another bill already considered in committee (or by multiple committees).

Non-Germane Amendments

An even more important opportunity for individual Senators is a result of the absence in the standing rules of any general requirement that the amendments offered by Senators on the floor must be germane or relevant to the bill being considered. The rules impose a germaneness requirement only on amendments to general appropriations and budget measures and to matters being considered under cloture; various statutes impose such a requirement on a limited number of other bills. (The Senate generally interprets germaneness strictly, to preclude amendments that expand the scope of a bill or introduce a specific additional topic.) In all other cases, Senators may propose whatever amendments they choose on whatever subjects to whatever bill the Senate is considering.

The right to offer non-germane amendments is extraordinarily important because it permits Senators to present issues to the Senate for debate and decision, without regard to the judgments of the Senate's committees or the scheduling decisions and preferences of its majority leader. Again consider the position of a Senator whose bill is not being acted on by the committee to which it was referred. Instead of introducing an identical bill and having it placed directly on the calendar, he or she may have a second and typically more attractive option: to offer the text of the bill as a floor amendment to another bill that has reached the floor and that can serve as a useful legislative "vehicle."

The possibility of this opportunity can make it extremely difficult to anticipate what will happen to a bill when it reaches the floor and how much of the Senate's time it will consume. The party

leaders and the bill's floor managers (typically, the chair and ranking minority Member of the committee with jurisdiction over the bill) may know what amendments on the subject of the bill are likely to be offered, but they cannot be certain that Senators will not want to also offer non- germane (and often quite controversial) amendments. In fact, it is not unusual for one or more non-germane amendments to occupy more of the Senate's attention than the subject the bill itself addresses.

Unanimous Consent Agreements

The Nature of Unanimous Consent Agreements

Just as the right of extended debate encourages Senate committee and party leaders to bring up bills for consideration by unanimous consent, the right to debate combined with the right to offer non-germane amendments encourages the same leaders to seek unanimous consent agreements limiting or foreclosing the exercise of these rights while a bill is being considered. Without such an agreement (or in the absence of a successful cloture process), the bill could be debated for as long as Senators wish—as could each amendment offered, whether germane or not, unless the Senate votes to table it. These are the essential conditions under which the Senate considers a bill if it adheres to its standing rules.

It is precisely to avoid these conditions that the Senate often debates, amends, and passes bills under very different sets of parliamentary ground rules—ground rules that are far more restrictive, but that can be imposed only by unanimous consent. One of the frequent purposes of these unanimous consent agreements is to limit the time available for debate, and thereby ensure that there will be no filibuster. Complex unanimous consent agreements of this special kind are sometimes called "time agreements."

In addition, before taking up a bill, or after the Senate has begun debating it, Senators often reach unanimous consent agreements to govern consideration of individual amendments that have been or will be offered. Less often today, the Senate reaches an encompassing agreement, limiting debate on a bill and all amendments to it, before or at the time the bill is called up for floor action.

The following example illustrates several contemporary features of such a comprehensive unanimous consent agreement:

Ordered, That on Tuesday, July 29, 2014, upon the confirmation of the Polaschik nomination, the Senate proceed to the consideration of H.R. 5021, an Act to provide an extension of Federal-aid highway, highway safety, motor carrier safety, transit, and other programs funded out of the Highway Trust Fund, and for other purposes; provided, that the only amendments in order to the bill be the following: Wyden Amdt. No. 3582; Carper- Corker-Boxer Amdt. No. 3583; Lee Amdt. No. 3584; and Toomey Amdt. No. 3585; provided further, that there be one hour of debate, equally divided between the proponents and opponents of each amendment and up to two hours of general debate on the bill, equally divided between the two Leaders, or their designees.

Ordered further, That upon the use of yielding back of time, the Senate vote in relation to the amendments in the order listed; provided, that no second degree amendments be in order to any of the amendments prior to the votes; provided, that no motions to commit be in order; provided further, that upon disposition of the Toomey amendment, the bill, as amended, if amended, be read a third time and the Senate vote on passage of the bill, as amended, if amended; further, that the vote on each amendment and the vote on passage of the bill be subject to a 60 affirmative vote threshold; provided further, that the Secretary

be authorized to make technical changes to amendments if necessary to allow for proper page and line number alignment.

Ordered further, That if the Senate passes H.R. 5021, the Senate proceed to the consideration of H.Con.Res. 108, providing for the correction of the enrollment of H.R. 5012; provided, that the concurrent resolution be agreed to and the motion to reconsider be laid upon the table with no intervening action or debate. (July 23, 28, 2014.)

The two essential features of this and comparable unanimous consent agreements are (1) a prohibition on any amendments not listed in the agreement, and (2) strict limitations on the time available for debating the bill and any questions that may arise during its consideration. Under the terms of this agreement, for example, the Senate as a whole may debate each amendment for no more than one hour. There is also a two-hour time limit for debate on the bill itself (that is, "general debate").

The differences between considering a bill under the terms of the Senate's standing rules and considering it under this kind of unanimous consent agreement are so great and so fundamental that they bear repeating. Under the standing rules, Senators may be able to offer whatever amendments,

even if non-germane, that they want (as long as there are not already pending amendments that must first be disposed of); under this agreement, only specified amendments are in order. Under the standing rules, Senators may debate the bill, each amendment, and a variety of other questions for as long as they want, subject only to limits that would be imposed under a successful cloture process; under this agreement, on each question, time for debate is strictly limited. Under the standing rules, each amendment (and passage of the bill) would be subject to a simple-majority vote threshold; under this agreement, a super-majority vote is required (reflecting the understanding by Senators that opponents of these questions could require a super-majority to invoke cloture in order to reach a vote). The differences could hardly be more dramatic. It must be emphasized, however, that such agreements are *unanimous consent* agreements. They cannot be imposed on the Senate by any vote of the Senate; they require the concurrence or acquiescence of each and every Senator.

Negotiating Time Agreements

Negotiating these complex unanimous consent agreements can be a difficult and time-consuming process, the responsibility for which falls primarily on the majority and minority leaders and the leaders of the committee with jurisdiction over the bill at issue. They consult interested Senators, but it would be impractical to consult every Senator about every bill scheduled for floor action. For this reason, individual Senators and their staffs take the initiative to protect their own interests by advising the leaders of their preferences and intentions. Negotiations sometimes take place on the floor and on the public record, but at least the preliminary discussions and consultations usually occur in meetings during quorum calls or off the floor. (The negotiation process may also be facilitated by use of the clearance process [or "hotline"], an informal communication mechanism by which each party's leadership gauges the preferences of its conference members.)

Senators prefer to expedite the conduct of legislative business whenever possible, and so normally cooperate in reaching time agreements. However, when Senators have special concerns—for instance, when they are intent on offering particular amendments or guaranteeing themselves ample time for debate—their interests must be accommodated. Any Senator who is dissatisfied with the terms of a proposed time agreement has only to object when it is propounded on the floor; so long as any one Senator objects, the standing rules remain in force with all the rights and opportunities they provide. As a result, time agreements may include exceptions to their general provisions in order to satisfy individual Senators. For example, a comprehensive agreement that generally limits debate on each first degree amendment to an hour and prohibits

non-germane amendments may identify one or more specific amendments that are exempted from the germaneness requirement, and also may provide different amounts of time for debating them.

In these ways, time agreements can be less restrictive than the one quoted earlier. There may be no agreement at all if one or more Senators decide to fully preserve their rights to debate and offer amendments. On many other occasions, however, an agreement's provisions are even more restrictive—for example, all amendments to the bill may be prohibited except for a few that are identified specifically in the agreement itself. If the Senate does accept a unanimous consent agreement, whatever its terms, it may be modified at a later time only by unanimous consent.

Other Unanimous Consent Agreements

In current practice, the Senate usually begins consideration of most bills without first having reached a time limitation agreement. In some cases, the floor managers expect few amendments and relatively little debate, making an elaborate agreement unnecessary. In other cases, the majority leader and committee chair cannot reach an agreement with all Senators, but proceed with the bill anyway because of its timeliness and importance. After the Senate has debated such a bill and controversial amendments for many hours or even days, the leaders often renew their attempts to reach an overall agreement limiting debate on each remaining amendment or setting a time for the Senate to vote on passage of the bill.

In the absence of a time agreement covering all amendments and other questions, the party leaders and the floor managers often try to arrange unanimous consent agreements for more limited purposes while the Senate is debating a bill. During consideration of a controversial amendment, a Senator may propose that the Senate agree—by unanimous consent—to limit any further debate on it. Senators also may agree to time limits on individual amendments before offering them. By unanimous consent, the Senate may set aside one amendment temporarily in order to consider another one that could not otherwise be offered at that time. Other agreements may define the order in which Senators will offer their amendments, postpone roll call votes until a later time that is more convenient for Senators, or even set a super-majority threshold for the adoption of a particular amendment.

These examples only begin to illustrate the many ways in which the Senate relies every day on unanimous consent arrangements. From routine requests to end a quorum call to extremely elaborate and complicated procedural "treaties," the Senate depends on unanimous consent requests and the willingness of Senators to agree to them.

The Daily Order of Business

The extent to which the Senate uses unanimous consent arrangements to supplement or supplant operation of its standing rules makes it difficult to predict with confidence what will actually take place on the Senate floor each day. This report already has mentioned some of the problems that can arise in scheduling legislation and in anticipating the time that will be consumed (and the amendments that Senators will offer) during consideration of each bill. In addition, the other proceedings that occur each day also depend on whether the Senate decides to operate under or outside of its rules.

The time at which the Senate convenes each day is set by a resolution the Senate adopts at the beginning of each Congress, but that time is often changed from day to day by unanimous consent—at the request of the majority leader—to suit changing circumstances. When the Senate does convene, and after the opening prayer and the Pledge of Allegiance, a brief period of "leader time" is set aside for the majority leader and for the minority leader, under a standing order also

established at the beginning of the Congress. During this time, the two party leaders may discuss the legislative schedule as well as their views on policy issues, and they also may conduct non-controversial business by unanimous consent.

What happens thereafter depends on whether the Senate is beginning a new legislative day. A legislative day begins when the Senate convenes after an adjournment, and it continues until the next adjournment. When the Senate recesses at the end of a day, as it sometimes does, a legislative day continues for two or more calendar days. (Standing Rules VII and VIII prescribe what the Senate should do at the beginning of each new legislative day, and one of the reasons the Senate may recess from day to day is to set aside the requirements imposed by these rules.)

Under the two standing rules, the first two hours of session on each new legislative day are called the "morning hour." They are a period for conducting routine business at a predictable time each day that does not interfere with the consideration of major legislation. The morning hour begins with the transaction of "morning business," which includes the introduction of bills and joint resolutions and the submission of Senate and concurrent resolutions and committee reports. During the remainder of the morning hour, the Senate can act on bills on the Calendar of Business. At the end of the morning hour, the Senate resumes consideration of the unfinished business—whatever bill, if any, was the pending business when the Senate adjourned.

In current practice, however, the Senate typically adjourns but, by unanimous consent, deems the morning hour to have expired; alternatively, occasionally the Senate recesses at the end of the day. In either case, there is no morning hour on the following day of session. Instead, the majority leader usually arranges by unanimous consent that "a period for transacting routine morning business" follow "leader time." Senators make brief statements on whatever subjects they like during this period, the length of which can change from day to day, depending on the legislative schedule. Also by unanimous consent, there may be other periods for transacting morning business during the course of the day when time is available and Senators wish to speak on subjects unrelated to the pending bill.

After the morning hour or the period (set by unanimous consent) for transacting routine morning business, the Senate normally resumes consideration of the bill that is either the unfinished business (if the Senate had adjourned on the preceding day) or the pending business (if the Senate had recessed instead). However, this bill may be set aside—temporarily or indefinitely—in favor of other legislative or executive business if the Senate agrees to motions or unanimous consent requests made for that purpose by the majority leader (or his designee). Before the end of the day, the majority leader also makes arrangements for the following day—establishing a meeting time by unanimous consent and commenting on the expected legislative program.

The Amending Process

The amending process is at the heart of the Senate's floor deliberations. If the Senate reaches a final vote on passing or defeating a bill, the bill is very likely to pass. It is through the amending process that Senators have an opportunity to influence the content of the bill before the vote on final passage occurs; this is an especially important opportunity for Senators who do not serve on the committee that marked up the bill and reported it.

When a bill is called up for floor consideration, opening statements usually are made by the two floor managers—the chair and ranking minority Member of the committee (or sometimes the subcommittee) with jurisdiction over the bill—and often by other Senators as well. These statements lay the groundwork for the debate that follows, describing the purposes and provisions of the bill, the state of current law and the developments that make new legislation desirable or

necessary, and the major points of controversy. These opening statements are a matter of custom and practice, however; the bill is open to amendment as soon as it is before the Senate.

The first amendments to be considered are any recommended by the committee reporting the bill, and so designated in the printed version of the bill "as reported." As each committee amendment is being debated, Senators may propose amendments to it and to the part of the bill the committee amendment would change. The Senate votes on any such amendments before it votes on the committee amendment itself. Thereafter, Senators may offer amendments in any order to any part of the bill that has not already been amended. The order in which amendments are offered depends largely on the convenience of the Senators proposing them, not on requirements imposed by standing rules or precedents. As a general rule, a Senator cannot propose an amendment to a bill while first degree (and possibly second degree) amendments to the bill are pending. It is not unusual, however, for the Senate to agree by unanimous consent to lay aside pending amendments temporarily in order to consider another amendment that a Senator wishes to offer at that time.

After a Senator offers an amendment, it must be read unless the Senate dispenses with the reading by unanimous consent (or by non-debatable motion, in the case of certain amendments that have been previously available). The Senate then debates the amendment and may eventually dispose of it either by voting "up or down" on the amendment itself or by voting to table it. (In some cases, an amendment is disposed of when it falls on a successful point of order.) However, the amending process can become far more complicated. Bills are amendable in two degrees, so before the Senate votes on a first degree amendment, it is subject to second degree amendments that propose to change its text. After voting on any second degree amendments, the Senate votes on the first degree amendment as it may have been amended. Third degree amendments— amendments to second degree amendments—are not in order.

Additional complications are possible, depending on whether the first degree amendment proposes (1) to insert additional language in the bill without altering anything already in the bill; (2) to strike out language from the bill without inserting anything in its place; (3) to strike out language from the bill and insert different language instead; or (4) to strike out the entire text of the bill (everything after the enacting or resolving clause at the very beginning of the measure) and replace it with a different text. In the case of a motion to insert, for example, Senators can offer as many as three first and second degree amendments before the Senate would potentially face votes on any of them; in the case of an amendment that is a complete substitute for the text of the bill, Senators can propose six or more first and second degree amendments to the substitute and to the original text of the bill before any offered amendments could receive votes.

These possibilities depend on several principles of precedence among amendments—principles governing the amendments that may be offered while other amendments are pending and also governing the order in which the Senate votes on the amendments that have been offered. Complicated amendment situations do not arise very often, but they are most likely to occur when the policy and political stakes are high. Majority leaders of the Senate have sometimes offered a series of amendments, one immediately after another, taking up available slots for pending amendments for the

purpose of “freezing” the amendment process so that no other amendments can be offered (except by unanimous consent) at that time.

Once a Senator has offered an amendment, the conditions for debating it depend on whether or not there is a time limitation for considering that particular amendment or all amendments to the bill (imposed either through a unanimous consent agreement, or via a successful cloture process). If there is no such limitation, each Senator typically may debate the amendment for as long as he or she pleases. However, any Senator who has been recognized may move to table the amendment, and that motion is not debatable. If there is a time limitation, the time provided is

both a minimum and a maximum. Senators may not make motions or points of order, propose other amendments, or move to table, until all the time for debating the amendment has been used or until all remaining time has been yielded back. After the time has expired, on the other hand, the amendment can be debated further only by unanimous consent or if the Senators controlling time for debating the bill as a whole choose to yield part of that time.

A number of general principles govern the amending process. For example, an amendment that has been defeated may not be offered again without substantive change. An amendment should not make changes in two or more different places in the bill, nor may it propose only to amend a part of the bill that already has been amended. If an amendment consists of two or more parts that could each stand as separate and independent propositions, any Senator may demand that the amendment be divided and each division treated as if it were a separate amendment (except that a motion to strike out and insert is not divisible). Generally speaking, Senators may not propose amendments to their own amendments, but they can modify or withdraw their amendments instead. If the Senate takes some “action” on an amendment (such as ordering the yeas and nays on it), the Senator who offered the amendment loses his right to modify it, but now gains the right to offer an amendment to his or her own amendment.

As mentioned before, floor amendments to most bills need not be germane unless cloture has been invoked, or unless a germaneness requirement is part of the unanimous consent agreement under which a particular bill is being considered (or under a few other specific circumstances). Alternatively, the Senate may, by unanimous consent, require that amendments to a bill be relevant to it; relevancy is a somewhat less restrictive standard that seeks to ensure that unrelated issues will not be raised in the form of amendments.

The amending process continues until Senators have no other amendments they wish to offer, until the entire bill has been changed by amendments, or until the completion of a successful cloture process. At that point, the Senate orders the bill engrossed and read a third time—a formal stage that precludes further amendments—and then votes on final passage.

Quorum Calls and Rollcall Votes

The Constitution requires that a quorum—that is, a majority of all Senators—be present to conduct business on the floor. Even though Senators have many responsibilities that frequently keep them

from the floor, the Senate presumes that a quorum is present unless a quorum call demonstrates that it is not.

A Senator who has been recognized may suggest the absence of a quorum at almost any time; a clerk then begins to call the roll of Senators. Senators may not debate or conduct business while a quorum call is in progress. If a majority of Senators do not appear and respond to their names, the Senate can only adjourn or recess, or attempt to secure the attendance of additional Senators. However, quorum calls usually are ended by unanimous consent before the clerk completes the call of the roll and the absence of a quorum is demonstrated. The reason is that most quorum calls are not really intended to determine whether a quorum is present.

The purpose of a quorum call usually is to suspend floor activity temporarily. If a Senator is coming to the floor to speak, a colleague may suggest the absence of a quorum until the expected Senator arrives. If the Senate finds itself confronted with unexpected procedural complications, if the majority leader needs to meet with several Senators on the floor about a possible unanimous consent agreement, or if the floor manager of a bill wants to discuss a compromise alternative to an amendment another Senator has offered—for any of these or many other reasons—a Senator may suggest the absence of a quorum to permit time for informal consultations. The time

consumed by many of these quorum calls permits intensive and productive discussions that would be far more difficult to hold under the rules of formal Senate debate.

The Constitution also provides that one-fifth of the Senators on the floor (assuming that a quorum is present) can demand a rollcall vote. Since the smallest possible quorum is 51 Senators, the support of at least 11 Senators is required to order a rollcall vote. A Senator who has been recognized can ask for "the yeas and nays" at any time that the Senate is considering a motion, amendment, bill, or other question. Agreement to this request does not terminate debate. Instead, if a rollcall is ordered pursuant to his request, then that is how the Senate will vote on the question when (or if) the time for the vote arrives. Thus, the Senate may order a rollcall vote on an amendment as soon as it is offered, but the vote itself may not take place for several hours or more (or, potentially, not at all), when Senators no longer wish to debate the amendment (or if a cloture process forces a vote).

The alternative to a rollcall vote usually is a voice vote in which the Senators favoring the bill or amendment (or whatever question is to be decided) vote "aye" in unison, followed by those voting "no." (Sometimes in relation to a voice vote—when the outcome of the vote is not in question—the presiding officer will note that "without objection, the amendment (or bill) is agreed to.") Although a voice vote does not create a public record of how each Senator voted, it is an equally valid and conclusive way for the Senate to reach a decision.

CONGRESSIONAL DISTRIBUTION MEMORANDUM

Parliamentary Phraseology for Presiding Over a Senate Committee Markup

This memorandum is intended for distribution to more than one congressional office.

This memorandum responds to multiple congressional requests for parliamentary phraseology a Senate committee Chair might use in a committee markup. It provides examples of language that might be commonly used to open a markup, lay down a legislative vehicle, provide for the offering and disposal of amendments, address points of order, and report a measure.

Some rules of the Senate affect committee proceedings. In addition, each Senate committee has its own set of written rules, and most committees have developed additional practices that can also affect the actions taken. This memorandum outlines the manner of proceeding under Senate rules and procedures, and it indicates where committee written rules and practices might also be applicable. Given the variation in proceeding among committees, however, the emphasis of this memorandum is necessarily on full Senate rules and precedents. Therefore, when preparing for a markup, Senate committees will likely alter the sample language provided here to fit their specific circumstances, rules, and practices.

Generally speaking, Senate committees conduct markups informally. Senators have found value in working cooperatively both before and during the markup, and the formal, public sessions sometimes serve largely to confirm policy agreements that have been negotiated prior to the meeting. In such situations, Senators generally know what to expect and do not raise questions with regard to process.[1] That said, sometimes there can be value in following rules and procedures. Many Senate committees have found that consistent practice reduces delays that can occur when Senators raise questions about the manner of proceeding, and perhaps the easiest way to be consistent is to follow written rules and long- established precedents. Furthermore, Senators generally find it easier to meet their goals and prepare for markup if they know in advance what opportunities they will have for debate and amendment.

[1] The rules of the Foreign Relations Committee even state: "Insofar as possible, proceedings of the committee will be conducted without resort to the formalities of parliamentary procedure and with due regard for the views of all members." (Rule 3(e); *Congressional Record*, daily edition, Feb. 28, 2011, p. S963).

Calling the Markup to Order, Opening Statements, and Laying Down the Vehicle

The rules of several committees require that a public announcement of the meeting be made prior to a committee markup, and some require that the meeting agenda items be specified.[2] Under the terms of these rules, or in accordance with committee practice, the text that will be before the committee for markup is often identified in the notice of the committee markup meeting. This text, sometimes referred to as the legislative "vehicle," could be an introduced and referred bill (e.g., S.123) or a draft bill that has not yet been introduced and therefore is not yet numbered.[3] The markup typically begins

with some reference to any notice provided and an identification of the text before the committee, such as:

CHAIR: Pursuant to notice, the Committee meets today for the purposes of considering the bill, [number and title of bill].

Senate rules allow a committee to set its quorum requirements as low as one-third of its members to transact business.[4] It is the practice of many committees to assume a quorum is present unless a point of order is made to the contrary. Other committees will not convene a markup unless at least one-third of its membership is present; some committees may also insist that one-third of its members be present at all times during a markup. Some committee Chairs open a markup by stating:

CHAIR: A business quorum is present.

Frequently, a Chair makes an opening statement to begin a markup, followed by a statement from the Ranking Member, and sometimes by all interested committee members, typically alternating by party.

CHAIR: The Chair wishes to make an opening statement.

CHAIR: The Chair now yields to the Ranking Member for any opening statement (s)he wishes to make.

CHAIR: Do other Senators wish to make opening statements on the bill?

After opening statements, consideration of the bill begins.

CHAIR: If there are no other opening statements, the Committee will proceed to the consideration of [number and/or title of bill] for amendment.

2 In addition, a standing order of the Senate requires that committees provide information regarding the time, place, and purpose of meetings for inclusion in the computerized schedule of committee and subcommittee meetings "immediately upon scheduling a meeting." (U.S. Congress, Senate Committee on Rules and Administration, *Senate Manual Containing the Standing Rules, Orders, Laws, and Resolutions Affecting the Business of the United States Senate*, prepared by Matthew McGowan Under the Direction of Howard Gantman, 110th Cong., 2nd sess., S.Doc. 110-1 (Washington: GPO, 2008), p. 159).

3 For information on the selection of a text for markup, see CRS Report 98-244, *Markup in Senate Committee: Choosing a Text*, by Elizabeth Rybicki.

4 Rule XXVI, paragraph 7(a)(1). As noted later in this memorandum, a majority of committee members must be physically present for the vote to order a measure reported. Note also that quorum thresholds may be much lower for certain committee activities, e.g., taking testimony. See Senate Rule XXVI, paragraphs 7(a)(1) and 7(a)(2).

Amendment in the Nature of a Substitute or Other Amendment Proposed by Chair

Sometimes, the first legislative action the committee Chair takes in a markup is to offer a full-text alternative for the markup vehicle. This new text is formally called an "amendment in the nature of a substitute," and it proposes to strike out all the text of the vehicle and replace it with a new text.[5] Such an amendment could be offered to an introduced and referred bill or to a draft vehicle.

Alternatively, a variety of changes to the vehicle may have been negotiated, but not drafted into a single amendment that replaces the entire pending vehicle. Sometimes these changes are considered as a single proposal and referred to as a "managers' amendment," [6] particularly when the changes have been agreed upon by the Chair and Ranking Member of the committee.

If the Chair intends to offer a complete substitute amendment or some other amendment at the outset of consideration, s/he would – immediately after laying down the vehicle – say:

CHAIR: I offer a [managers'] amendment [in the nature of a substitute] to the [draft] bill and ask unanimous consent that it be considered as read.

An additional request from the Chair may be advisable in certain cases when this initial negotiated amendment is not a complete substitute amendment. For example, an amendment in the nature of a substitute (i.e., full-text substitute) offered at the outset of consideration is not considered a first degree amendment, and is thus still open to amendment in two degrees; however, an amendment that is not a full-text substitute does not automatically receive such status. To allow amendments in two degrees to any part of the text in the latter situation, the committee could, by unanimous consent, agree to adopt such an amendment and consider it as part of the original base text for further consideration:

CHAIR: I ask unanimous consent that the managers' amendment be adopted and considered as original text for the purpose of amendment.

Possible Unanimous Consent Modifications to Amending Process

In the Senate, a measure is open for amendment at any point, meaning that amendments need not be offered in any particular order to the vehicle. Committees occasionally agree to provide more structure to the amending process by proceeding through the bill by titles. If this is the preferred route, the committee may agree to a unanimous consent request to that effect:

CHAIR: I ask unanimous consent that the committee amend the bill title-by-title rather than having it open for amendment at any point. Once we have finished one title, we will move to consider amendments to the next title, and will only return to a previous title by unanimous consent.

Parameters on the amending process that require unanimous consent – such as this one – typically will have been negotiated among Senators before the markup. In this case, rather than asking unanimous

[5] Such an amendment would read, "Strike all after the enacting clause and insert ....."

[6] "Managers' amendment" does not have a technical procedural meaning, and may also be a term applied to the type of full-text substitute amendment just described, as well. Typically the term implies that the amendment incorporates a variety of changes to the text that have been negotiated among a number of Senators.

consent, a Chair sometimes uses more informal language along the lines of "By unanimous consent, the managers' amendment is agreed to and considered as original text, and the committee will proceed by considering amendments title-by-title."

Committees may choose to operate under other modifications to the amending process – either explicitly or, rather, pursuant to expectations shared by the committee as a whole based on past practices and customs; to prevent misunderstandings, the Chair may choose to make explicit any such agreement or expected practices at this stage of the markup.

Offering of Amendments by Senators

Before Senators begin offering amendments, the Chair may wish to remind committee members about the operation of any pre-filing requirements that may be provided for in committee rules, and the conditions under which Senators may modify their amendments.

Under Senate rules, amendments must be read aloud. Typically, the reading is waived by unanimous consent.[7] As soon as a Senator proposes his or her amendment, the Chair directs the clerk to read the amendment.

CHAIR: The clerk will read the amendment.

Once the reading has begun, the clerk is commonly interrupted by a request that the reading be dispensed with by unanimous consent. Alternatively, the Chair might make this request as soon as the amendment is offered.

CHAIR: Without objection, we will dispense with the reading. Senator [name] is recognized to speak on the amendment.

Senate rules and precedents place limits on the number and form of amendments that can be pending at any one time, and the Chair is responsible for enforcing these limitations.[8] The amending process rarely becomes complex in Senate committee markup, however, as arrangements are generally made to allow Senators to offer amendments in turn.

Disposition of Amendments

There is no Senate rule that allows a simple majority of Senators to bring debate to a close when it is ready to vote. In addition, most Senate committees do not have rules that allow the committee to end debate on a matter.[9] Instead, the Chair puts the question on an amendment when no Senator seeks recognition to discuss it. The Chair might first inquire whether any Senator wishes to speak further:

[7] A new standing order of the Senate allows the reading of an amendment on the floor to be waived by nondebatable motion if the amendment was submitted 72 hours before the motion was made and is in the *Congressional Record* (S.Res. 29, 112th Congress). It is not clear whether such a motion would be in order in committee; generally, committee amendments are not submitted to the *Congressional Record.*

[8] For more information, see CRS Report 98-853, *The Amending Process in the Senate*, by Betsy Palmer, pp. 8-19.

[9] The exceptions are the Committee on Finance and the Committee on the Judiciary. Finance Committee Rule 8 states, "If the chairman determines that a motion or amendment has been adequately debated, he may call for a vote on such motion or

amendment, and the vote shall then be taken, unless the committee votes to continue debate on such motion or amendment, as the case may be. The vote on a motion to continue debate on any motion or amendment shall be taken without debate."

(continued...)

CHAIR: Is there any further debate on the amendment? Seeing none, the question is on the amendment. All those in favor say "aye." All those opposed, "no."

Sometimes the Chair adopts a slightly different approach in order to expedite the process:

CHAIR: Seeing no further debate on the amendment, the question is on its adoption. All those in favor say "aye." All those opposed, "no."

In either case, Senators might respond to the Chair by seeking recognition to continue to discuss the amendment. If a Senator does so, the Chair must allow the committee member to make his or her remarks, and then, when no other Senator seeks recognition to speak, the Chair can put the question on adoption.

It is common in Senate committees for there to be wide support for certain amendments and an expectation that they will be approved. In such situations, instead of asking the committee to vote on an amendment, the Chair might instead assume there will be unanimous consent to approve the amendment, and state:

CHAIR: Without objection, the amendment is agreed to.

Any Senator on the committee could, however, respond to the Chair by stating "I object," and that single objection would prevent the immediate approval of the amendment. It takes unanimous consent—the agreement of every Senator—to agree to an amendment without a vote.

A numerical majority of a committee can end debate on an amendment if it is prepared to defeat the amendment. An amendment can be permanently and adversely disposed of by a non-debatable motion to table. If a Senator moves to table a pending amendment, the Chair would immediately call for a vote on the question.

CHAIR: The question is on the motion to table the amendment. All those in favor say "aye." All those opposed, "no."

Voting

The default method of voting in committee is by voice, in which the Chair asks those in favor to say "aye" and those opposed to say "no." The Chair then announces:

CHAIR: In the opinion of the Chair, the ayes [noes] have it. The ayes [noes] have it. The [amendment/motion] is [not] agreed to.

After the preliminary announcement by the Chair of the result of a voice vote, a Senator may wish to request a roll call vote. Immediately upon hearing the Chair announce that his or her initial opinion that the "ayes" or "noes" have it, a Senator would state to the Chair that s/he requests a recorded (or roll call)

(...continued)

(*Congressional Record*, daily edition, Feb. 17, 2011, p. S838); Judiciary Committee Rule IV states, "The Chairman shall entertain a non-debatable motion to bring a matter before the Committee to a vote. If there is objection to bring the matter to a vote without further debate, a roll call vote of the Committee shall be taken, and debate shall be terminated if the motion to bring the matter to a vote without further debate passes with ten votes in the affirmative, one of which must be cast by the minority." (*Congressional Record*, daily edition, Feb. 17, 2011, p. S837). The Judiciary Committee has 18 members.

vote.[10] The constitutional requirement for a second on a request for the yeas and nays is one-fifth of those present (assuming a quorum is present). If the committee wishes to hew to this standard, the Chair would say:

CHAIR: Is there a sufficient second? There is a sufficient second. The clerk will call the roll.

However, many committees have explicit or implicit practices to proceed to a recorded vote if any Senator requests it. In this case, the request for a roll call vote would be immediately followed by the Chair stating:

CHAIR: The clerk will call the roll.

Note also that the Chair only proceeds to direct the clerk to call the roll if the request for the yeas and nays is made in connection with a voice vote. If a Senator simply asks for the yeas and nays during debate on his or her amendment, this does not cause a vote to occur at that time. In this situation, the Chair responds to the request by saying:

CHAIR: Is there a sufficient second? There is a sufficient second. The yeas and nays are ordered.

Later, when no Senator seeks recognition to debate the amendment any further:

CHAIR: The question is on agreeing to the amendment. The yeas and nays have already been ordered. The clerk will call the roll.

After the clerk has reported the vote tally to the Chair, the Chair announces the result.

CHAIR: On this vote the yeas are [__] and the nays are [__]. The amendment is [not] agreed to.

Senators can authorize another Senator, usually the Chair, to vote on his or her behalf in committee, a practice known as proxy voting. Each standing committee has rules concerning the circumstances under which proxy voting may be used. An important restriction on proxy voting is that, to report a measure, a majority of the committee must be physically present for the vote, and any votes cast by proxy cannot make the difference in ordering the measure reported.[11]

Points of Order and their Disposition

A Senator can allege that a committee is not proceeding properly under the rules by making a point of order. A point of order made during a committee markup is ruled upon by the Chair. [12] Such a point of order is not subject to debate, though the Chair may entertain some debate for his or her own edification. The Chair then typically restates the point of order and explains the ruling. If the Chair agrees that Senate or committee rules were being (or about to be) broken, then s/he sustains the point of order by stating:

[10] Typically, chairs grant some leeway in regard to the timing of the request for a recorded vote, allowing the request even if it comes just after the chair has made the final announcement of the vote tally and the disposition of the question.

[11] For more information, see individual committee rules as well as CRS Report RS22953, *Proxy Voting and Polling in Senate Committee*, by Christopher M. Davis.

[12] For more on points of order in the Senate, see CRS Report 98-306, *Points of Order, Rulings, and Appeals in the Senate*, by Valerie Heitshusen. To inquire about a procedural issue, a Senator may state a parliamentary inquiry to the Chair. The statement of the Chair in response to these inquiries is not subject to debate or appeal.

CHAIR: I am prepared to rule on the point of order. The Senator has made a point of order that [_____]. The Chair finds that [_____]. The point of order is sustained [and the amendment falls].

Alternatively, if the Chair does not believe the point of order is supported:

CHAIR: The Senator has made a point of order that [_____]. The Chair finds that [_____]. Therefore, the point of order is not well-taken.

After a ruling, another Senator may appeal the ruling of the Chair. Appeals are not subject to a debate limit. As in the disposition of an amendment, the committee may vote on the appeal only after no Senator seeks further debate on it.[13]

CHAIR: If there is no further debate on the appeal, the question is on the decision of the Chair. Shall the decision of the Chair stand as the judgment of the committee? All those in favor say aye. All those opposed, no.

CHAIR: The ayes [noes] appear to have it. The ayes [noes] have it, and the committee sustains [overrules] the decision of the Chair.

An appeal of a Chair ruling is subject to a non-debatable motion to table. If a tabling motion on the appeal were made and agreed to, the effect would be to sustain the ruling of the Chair.

Chair: The Senator moves to table the appeal of the ruling of the Chair. All those in favor of tabling the appeal say “aye,” all those opposed, “no.” The motion to table is agreed to. The ruling of the Chair is sustained.

Ordering a Measure Reported

A markup concludes when the committee votes to order the measure reported to the full Senate.[14] Senate rules, a majority of the committee must be physically present to order a measure reported. Committees nearly always order a measure reported favorably, although they could order it reported unfavorably or without recommendation. As in the case of amendments, the Chair puts the question on reporting the measure when no committee member seeks recognition to propose additional amendments or debate the issue further.

If the committee is marking up a measure that has already been introduced, numbered (S. 123, S.J.Res. 123, etc.), and referred to the committee,[15] the Chair could say:

[13] As noted previously, the Senate Committees on Finance and on Judiciary each have a committee rule providing that a simple majority may end consideration and vote; these rules would appear to apply to an appeal of the ruling of the Chair.

[14] Senate committees also vote to report out nominations. These meetings usually are not considered "markups" because nominations cannot be amended. The parliamentary language the Chair might use to order a nomination reported is similar to that for legislation: "If there is no further debate, the question is on ordering the nomination reported. A reporting quorum is present. All those in favor say 'aye.' All those opposed, 'no.'" For more information, see CRS Report RL31980, *Senate Consideration of Presidential Nominations: Committee and Floor Procedure*, by Elizabeth Rybicki, pp. 6-7.

[15] For information on the selection of a text for markup, see CRS Report 98-244, *Markup in Senate Committee: Choosing a Text*, by Elizabeth Rybicki.

Under

CHAIR: If there is no further debate or amendment, the question is on ordering the bill [number and/or title of bill] favorably reported. A reporting quorum is present. All those in favor say "aye." All those opposed, "no."

If the committee has agreed to amendments to a numbered bill, the Chair would say:

CHAIR: If there is no further debate or amendment, the question is on ordering the bill [number and/or title of bill] favorably reported with amendments. A reporting quorum is present. All those in favor say "aye." All those opposed, "no."

If the committee has agreed to one substitute in the nature of a substitute (as amended, if amended) to a numbered bill, the Chair would say:

CHAIR: If there is no further debate or amendment, the question is on ordering the bill [number and/or title of bill] favorably reported with an amendment in the nature of a substitute.[16] A reporting quorum is present. All those in favor say "aye." All those opposed, "no."

If the committee is marking up a draft text instead of a measure that has already been introduced and received a number, then the Chair could say:

CHAIR: If there is no further debate or amendment, the question is on ordering that the bill [title of bill], as amended, be reported as an original bill. A reporting quorum is present. All those in favor say "aye." All those opposed, "no."

Sometimes, the Chair arranges for another Senator to move that a measure be reported.[17] Although this is a common practice, it is not necessary. But if made, the motion is debatable under the regular rules of the Senate. Thus, a Senator cannot move that a bill be reported in an effort to end debate during the markup.

After the voice vote on a motion to report, a Senator might request a recorded vote, as detailed earlier. If the "ayes" prevail, the Chair states:

CHAIR: The ayes are [__], the noes are [__], and the bill [number and title] is reported favorably.

Other Closing Steps

The markup often ends with the Chair stating:

CHAIR: I ask unanimous consent that in preparing the measure for reporting, the staff be authorized to make any required technical and conforming changes.

If there is going to be a written committee report, Senate rules grant committee members the right to have their views printed in the report if they give notice when the committee orders the measure reported.[18]

[16] The Chair might refer to the amendment as "complete substitute" rather than an "amendment in the nature of a substitute."

[17] On occasion, Senators in committee sometimes "second" this motion, an action that is not required under the rules and procedures of the full Senate.

[18] The rule does not apply to the Senate Appropriations Committee.

The Chair might therefore ask if any Senators wish to give notice, or, if notice has already been received, announce:

CHAIR: Under Senate Rule XXVI, paragraph 10(c), those Senators who gave notice of their intent to file supplemental, minority or views shall have [at least three] calendar days to file such views in writing with the committee clerk.

Congressional clients are welcome to direct questions to either listed author of this memorandum.

Awards

In order to judge the effectiveness and authenticity of your role portrayal in this simulation of the United States Senate, Stetson University has appointed a number of judges that will observe committee hearings and some of the Senate sessions. These judges will be asked to make recommendations for the awards listed below, and those selected will be recognized at the Awards Banquet on Saturday.

Floyd M. Riddick Best Senator Award: Given to the Model Senator who best exemplifies excellence in every aspect of the Model Senate. They will not only organize and speak in a rational, informed manner; gain the respect of their fellow senators, influence other senators, and maintain close adherence to the political and policy outlook of the portrayed senator, but also demonstrate a sound understanding of Senate procedure and how to use that understanding to further their and their party's policy goals.

T. Wayne Bailey Outstanding Senator Award: Will be given to four Model U.S. Senators who (1) organize and speak in a rational, well-informed manner, (2) gain the respect of fellow Senators, (3) understand the correct procedures for passing legislation, (4) are able, to some extent, to influence others' opinions, and (5) maintain close uniformity with regards to the political and policy outlook of the portrayed Senator. This award will require a great deal of preparation and often a bit of acting.

Most Effective Committee: Judged on the basis of the manner in which the committee conducts itself in discussing bills; also the quality of legislation reported out of the committee and the effective use of witnesses and their testimony.

Best Committee Chair: Judged on the skill with which he or she guides discussion and keeps order. Chairs should see to it that everyone has a chance to speak and that the witnesses are effectively used.

Best Ranking Member: Judged on the ability in which he or she leads the committee's minority members in discussion, debate, and decision-making. Ranking members seek to shape legislation and represent the minority party's interests within the committee structure.

119TH CONGRESS
1ST SESSION

S. 1811

To ensure treatment in the military based on merit and performance, and for other purposes.

IN THE SENATE OF THE UNITED STATES

JUNE 6, 2023

Mr. WICKER introduced the following bill; which was read twice and referred to the Committee on Armed Services

---

A BILL

To ensure treatment in the military based on merit and performance, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Short title.

This Act may be cited as the "Military Merit, Fairness, and Equality Act of 2023".

SEC. 2. Findings.

Congress makes the following findings:

(1) The United States Armed Forces is the greatest civil rights program in the history of the world.

(2) Former Chairman of the Joint Chiefs General Colin Powell wrote that "the military [has] given African-Americans more equal opportunity than any other institution in American society".

(3) Today's Armed Forces is the most diverse large public institution in the country, and brings together Americans from every background in the service of defending the country.

(4) Military readiness depends on the guarantee of equal opportunity, without the promise of an equal outcome, because warfare is a competitive endeavor and the nation's enemies must know that the United States Armed Forces is led by the best, brightest, and bravest Americans.

(5) The tenets of critical race theory are antithetical to the merit-based, all-volunteer, military that has served the country with great distinction for the last 50 years.

SEC. 3. Definition of equity.

For the purposes of any Department of Defense Diversity, Equity, and Inclusion directive, program, policy, or instruction, the term "equity" is defined as "the right of all persons to have the opportunity to participate in, and benefit from, programs, and activities for which they are qualified".

SEC. 4. Prohibitions.

(a) DIRECTIVES.—The Department of Defense shall not direct or otherwise compel any member of the Armed Forces, military dependent, or civilian employee of the Department of Defense to personally affirm, adopt, or adhere to the tenet that any sex, race, ethnicity, religion or national origin is inherently superior or inferior.

(b) TRAINING AND INSTRUCTION.—No organization or institution under the authority of the Secretary of Defense may provide courses, training, or any other type of instruction that directs, compels, or otherwise suggests that members of the Armed Forces, military dependents, or civilian employees of the Department of Defense should affirm, adopt, or adhere to the tenet described in subsection (a).

(c) DISTINCTIONS AND CLASSIFICATIONS.—

(1) IN GENERAL.—No organization or institution under the authority of the Secretary of Defense shall make a distinction or classification of members of the Armed Forces, military dependents, or civilian employees of the Department of Defense based on account of race, ethnicity, or national origin.

(2) RULE OF CONSTRUCTION.—Nothing in this subsection shall be construed to prohibit the required collection or reporting of demographic information by the Department of Defense.

SEC. 5. Merit requirement.

All Department of Defense personnel actions, including accessions, promotions, assignments and training, shall be based exclusively on individual merit and demonstrated performance.

119TH CONGRESS
1ST SESSION

S. 4029

To prohibit the Department of Defense from offering services through, or maintaining a business relationship with, Tutor.com.

IN THE SENATE OF THE UNITED STATES

MARCH 21, 2024

Mr. COTTON introduced the following bill; which was read twice and referred to the Committee on Armed Services

---

A BILL

To prohibit the Department of Defense from offering services through, or maintaining a business relationship with, Tutor.com.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Short title.

This Act may be cited as the "Ban Chinese Communist Party Access to U.S. Military Students Act of 2024".

SEC. 2. Prohibition of Department of Defense usage of Tutor.com.

(a) FINDINGS.—Congress makes the following findings:

(2) the prohibition or regulations, as applicable, are—

(A) consistent with the law of the State in which the specific Federal land or water is located;

Expressing the sense of the Senate that the United States, States, cities, Tribal nations, businesses, institutions of higher education, and other institutions in the United States should work toward achieving the goals of the Paris Agreement.

SCHIFF, MR. PADILLA, MR. SCHUMER, MR. COONS, MRS. SHAHEEN, MR. KAINE, MS. ROSEN, AND MS. DUCKWORTH) submitted the following resolution; which was referred to the Committee on Foreign Relations

---

RESOLUTION

Expressing the sense of the Senate that the United States, States, cities, Tribal nations, businesses, institutions of higher education, and other institutions in the United States should work toward achieving the goals of the Paris Agreement.

Whereas 195 of the 198 parties to the United Nations Framework Convention on Climate Change have acceded to the decision by the United Nations Framework Convention on Climate Change's 21st Conference of Parties in Paris, France, adopted December 12, 2015 (referred to in this preamble as the "Paris Agreement");

Whereas the Climate Change 2023 Synthesis Report by the Intergovernmental Panel on Climate Change found that—

(1) human activity has been the dominant cause of observed climate change over the past century;

(2) human-caused climate change has led to widespread and rapid changes in the atmosphere, ocean, cryosphere, and biosphere;

(3) vulnerable communities that have historically contributed the least to human-caused climate change are disproportionately affected by its impacts;

(4) adverse impact from human-caused climate change will continue to intensify;

(5) continued emissions will further impact all components of the climate system, and changes in weather and climate extremes will become larger;

(6) in the near term, global warming is more likely than not to reach 1.5 degrees Celsius even under low greenhouse gas emission scenarios;

(7) economic damages from climate change are present in climate-exposed sectors like agriculture, forestry, fishery, energy, and tourism;

(8) global temperatures must be kept below 1.5 degrees Celsius above pre-industrialized levels to avoid the most severe impacts of a changing climate;

(9) limiting global warming to 1.5 degrees Celsius will require rapid, deep, and immediate greenhouse gas emission reductions; and

(10) deep, rapid, and sustained mitigation and adaptation measures between 2020 and 2030 would help to reduce loss and damage for humans and ecosystems;

Whereas, in 2024, the National Oceanic and Atmospheric Administration reported 27 disasters that each resulted in at least $1,000,000,000 in damages and, in total, an estimated amount of $182,700,000,000 in damages;

Whereas the National Aeronautics and Space Administration determined that in 2020, the decrease in greenhouse gas emissions in the United States was due to the economic recession associated with the impacts of the coronavirus pandemic;

Whereas, in 2021 and 2022, carbon dioxide emissions from fossil fuel consumption in the United States rose 8 percent relative to 2020 and 1 percent relative to 2021, returning to pre-pandemic levels;

Whereas, in 2022, the Energy Information Administration reported that renewable energy generated more power than coal for the first time in the United States;

Whereas, in 2023, approximately 40 percent of the global electricity supply was provided by zero-carbon sources, according to the International Energy Agency;

Whereas, in 2024, automakers sold more than 1,300,000 electric vehicles in the United States, making up 8 percent of all new vehicles sales;

Whereas the State of California has a strategy to reduce greenhouse gas emissions to 48 percent below 1990 levels by 2030 and reduce greenhouse gas emissions by 85 percent by 2045;

Whereas, in the United States, 90 cities, 11 counties, 2 States, and the District of Columbia have adopted 100 percent clean and renewable energy goals, and 217 companies have committed to 100 percent renewable energy;

Whereas, since Public Law 117–168 (commonly known as the ‘Inflation Reduction Act’), the largest United States investment in climate and clean energy in history was passed in August 2022,

clean energy companies have announced or advanced nearly 750 projects, more than $422,000,000,000 in investments, and created more than 400,000 new clean energy jobs;

Whereas more than 85 percent of the investments from the Inflation Reduction Act were made in counties with below average college graduation rates and more than 75 percent of investments were made in areas with below average median household incomes;

Whereas the Infrastructure Investment and Jobs Act (Public Law 117–58) and the Inflation Reduction Act are estimated to create up to 1,700,000 new jobs by 2030 and 2,900,000 jobs by 2035;

Whereas, in 2024, the United States submitted a new nationally determined contribution, in accordance with the Paris Agreement, to reduce greenhouse gas emissions in the United States by 61 to 66 percent below 2005 levels by 2035, which is made possible in part by programs and investments supported by the Inflation Reduction Act and the Infrastructure Law Investment and Jobs Act (Public Law 117–58);

Whereas, in 2023, more money was invested in solar energy than in oil for the first time globally;

Whereas, in 2023, more than 8,300,000 people in the United States worked in the energy sector in all 50 States, including in industries relating to wind energy, solar energy, energy efficiency, clean vehicles, and energy storage;

Whereas, in 2023, approximately 495,871 people in the United States were working in the solar and wind industries, including roofers, electricians, and steel workers;

Whereas the 2024 U.S. Energy and Employment Jobs Report published by the Department of Energy found that new clean energy jobs are outpacing the rest of the energy sector and United States economy by more than 2 times;

Whereas the vehicle emissions standards updated by the Environmental Protection Agency in 2024 for vehicle model years 2027 through 2032 are predicted—

(1) to provide $13,000,000,000 in annual health benefits from air pollution reduction;

(2) to save drivers nearly $6,000 over the lifetime of a new vehicle from fuel and maintenance costs; and

(3) to prevent 25,000 premature deaths;

Whereas the America Is All In coalition—

(1) has evolved from the 2017 launched We Are Still In Coalition to become the largest subnational climate coalition in the United States composed of States, Tribal nations, cities, businesses, universities, healthcare organizations, faith groups, and cultural institutions;

(2) has committed to uphold the Paris Agreement and formally reaffirmed that commitment at the recent ninth anniversary of the landmark Paris Agreement;

(3) represents approximately 3⁄4 of the gross domestic product of the United States and 2⁄3 of the population of the United States through city and State partners; and

(4) has committed to supporting subnational climate leaders as they build climate resilience and sustainable supply chains;

Whereas on the day before President Donald Trump announced the withdrawal of the United States from the Paris Agreement on June 1, 2017, Hua Chunying, spokesperson of the Ministry of Foreign Affairs of the People's Republic of China, which is the world's current largest emitter of greenhouse gas emissions, said "China will stay committed to upholding and promoting the global governance on climate change, and take an active part in the multilateral process on climate change and promote green, low-carbon and sustainable growth of the world.";

Whereas, according to the International Energy Agency, China has made more than $800,000,000,000 in foreign investment in clean energy and energy storage infrastructure around the world since 2016; and

Whereas the United States needs both a fully engaged Federal Government and States, cities, businesses, and all subnational actors working together to reduce emissions, avoid the worst effects of climate change, and compete in the global clean energy market: Now, therefore, be it

Resolved, That it is the sense of the Senate that the United States—

(1) Should remain a party to the Paris Agreement;

(2) Should support policies at the Federal, State, and local level that promote the reduction of global warming pollution and aim to meet the objectives of the Paris Agreement; and

(3) Should support the clear intents and efforts of businesses, investors, and whole-of-American-society to take action on climate change.

S. 5523

To provide clarification of assistance related to safeguarding and the elimination of landmines, other explosive remnants of war, and conventional arms.

IN THE SENATE OF THE UNITED STATES

DECEMBER 12, 2024

Mr. WELCH (for himself, Ms. BALDWIN, Mr. BOOKER, Mr. SANDERS, Mrs. MURRAY, Mr. WHITEHOUSE, and Mr. MERKLEY) introduced the following bill; which was read twice and referred to the Committee on Foreign Relations

---

A BILL

To provide clarification of assistance related to safeguarding and the elimination of landmines, other explosive remnants of war, and conventional arms.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Conventional Weapons Destruction and Legacy of Senator Patrick Leahy Act".

SEC. 3. CLARIFICATION OF ASSISTANCE RELATING TO SAFEGUARDING AND ELIMINATION OF CONVENTIONAL WEAPONS.

The Department of State Authorities Act of 2006 (Public Law 109–472) is amended by inserting after section 11 (22 U.S.C. 2349bb–6) the following new section:

"SEC. 11A. PURPOSES OF ASSISTANCE FOR HUMANITARIAN DEMINING AND ELIMINATION OR SECURING OF CONVENTIONAL WEAPONS.

"(a) FINDINGS.—Congress finds the following:

"(1) Landmines and other explosive remnants of war threaten populations after conflicts end, and humanitarian demining is a fundamental part of recovery from conflict.

"(2) Clearing the land of explosive remnants of war provides quantifiable threat reduction and allows affected persons to return to their homes and utilize the land.

"(3) Agriculture is disproportionately impacted by unexploded ordnance, endangering farmers and exacerbating food security. Subsistence farming, larger-scale agriculture, grazing, and other related activities are improved through humanitarian demining.

"(4) Decontaminated land can be returned to use for critical infrastructure development, and many other uses that enhance sustainable recovery and development.

"(5) Risk education bolsters the life-saving benefits of humanitarian demining activities, helping to minimize preventable injuries through community engagement, which in turn creates local buy-in and awareness of this vital assistance being provided by the United States.

"(6) Many countries lack the equipment, resources and facilities, and technical capacity to properly manage weapons and ammunition stockpiles. Weapons and Ammunition Management (WAM) or Physical Security and Stockpile Management (PSSM) programs are security sector partnerships based on the shared objectives of preventing the diversion of weapons, ammunition, and explosives, as well as unplanned explosions.

"(7) These projects include armory and munitions store construction and rehabilitation, and other security improvements, weapons and ammunition disposal, stockpile management training and guidelines, needs assessments, stockpile risk assessments, mitigation and management plans, and marking and record-keeping.

"(8) This assistance, provided to a range of security forces including local police, is focused on providing necessary equipment and technical expertise in a sustainable way, allowing partners to establish, implement, and train in

WAM/PSSM best practices and compliance, as well as conduct their own safe disposal of obsolete weapons, ammunition, and munitions.

"(9) These programs not only reduce instability and civilian harm from armed violence caused by weapons diversion, but also provide the United States with key security partnerships. By reducing armed violence and instability, these programs can play a crucial role in addressing the root causes of migration and forced displacement, of particular interest to the United States as it pertains to its southern border.

"(10) Risk education expands the scope of WAM/PSSM programs beyond the principal partnerships, providing training to local police and communities on safer and more secure weapons storage and salvage through community engagement that also saves lives and creates buy-in and awareness of this vital assistance that is being provided by the United States.

"(b) PURPOSES OF HUMANITARIAN DEMINING AND CONVENTIONAL WEAPONS ELIMINATION OR SECURING ACTIVITIES.—

"(1) HUMANITARIAN DEMINING ACTIVITIES.—The purposes of the activities authorized in section 11(b)(1) are—

"(A) to ensure the return of affected populations to the safe access to their homes and land;

"(B) to enable affected populations to safely and productively utilize land for agriculture;

"(C) to clear threats from land to permit and encourage critical infrastructure and other development;

"(D) to educate affected populations about the dangers of landmines and other unexploded ordnance as well as United States efforts to provide the lifesaving benefits of humanitarian demining activities; and

"(E) to integrate humanitarian demining and related activities with other assistance to ensure effective recovery from conflict.

"(2) CONVENTIONAL WEAPONS ELIMINATION OR SECURING ACTIVITIES.—The purposes of the activities authorized in section 11(b)(3) are—

"(A) to ensure the safe securing and diversion prevention of weapons, ammunition, and explosives in the stores of foreign partners;

"(B) to build the capacity of the security sectors of foreign partners to properly eliminate or manage weapons and ammunition stockpiles through WAM, PSSM, and related programs;

"(C) to educate local police and other officials and the wider population at the local level on safer and more secure weapons storage and salvage as well as United States efforts to provide the lifesaving benefits of conventional weapons elimination, securing, and management;

"(D) to establish and strengthen security cooperation with foreign partners to reduce armed violence and instability in support of important United States national security and foreign policy objectives; and

"(E) to integrate conventional weapons elimination and securing and related activities with other assistance to ensure effective recovery from conflict.".

To require an annual report on the unfunded programs, activities, and mission requirements within the Department of State and the United States Agency for International Development.

IN THE SENATE OF THE UNITED STATES

JULY 30, 2024

Mr. KAINE (for himself and Mr. YOUNG) introduced the following bill; which was read twice and referred to the Committee on Foreign Relations

---

A BILL

To require an annual report on the unfunded programs, activities, and mission requirements within the Department of State and the United States Agency for International Development.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the "Fully Funding our National Security Priorities Act".

SEC. 2. FINDINGS.

Congress finds the following:

(1) A report issued by the Department of State in 2023 identified a $41,300,000,000 gap between the resources made available to the Department of State and the United States Agency for International Development and the resources required to effectively counter the People's Republic of China in the Indo-Pacific region.

(2) While the Department of State and the United States Agency for International Development remain less than fully funded, the PRC has provided some $1,340,000,000,000 in grants and loans over the past 22 years. In October 2023, the PRC and President Xi announced an additional $100,000,000,000 for China’s development banks.

(3) As competitors like the PRC and Russia expand their global diplomatic footprints, the Department of State today has, on average, a 13 percent staffing gap.

SEC. 3. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) the United States is a beacon of democracy and freedom in an increasingly fraught world;

(2) the Department of State, as a critical national security agency, remains chronically understaffed and underfunded at a time when geopolitical rivals, including the People’s Republic of China, are rapidly expanding their global diplomatic presences; and

(3) it is imperative to empower the Department of State and the United States Agency for International Development to ensure the United States can—

(A) effectively advance the national security interests of the United States;

(B) respond strategically to emerging technologies; and

(C) respond with flexibility to metastasizing global threats.

SEC. 4. ANNUAL REPORT.

(a) DEFINED TERM.—In this section, the term "unfunded priority", with respect to a fiscal year, means a program, activity, or mission requirement of an element of the Department of State or the United States Agency for International Development (referred to in this section as "USAID") that—

(1) is not funded in the budget for such fiscal year submitted by the President to Congress pursuant to section 1105 of title 31, United States Code;

(2) is necessary to fulfill a foreign policy or national security objective or to satisfy an information requirement associated with a goal or objective outlined in the Joint Strategic Plan agreed upon by the Department of State and USA/ID; and

(3) would have been recommended for funding by the Secretary of State or the USAID Administrator if—

(A) additional resources had been available for such budget to fund such program, activity, or mission requirement; or

(B) the program, activity, or mission requirement has emerged since such budget was formulated.

(b) IN GENERAL.—Not later than 10 days after the date on which the budget for any fiscal year is submitted by the President to Congress, the Secretary of State and USAID Administrator shall each prepare and submit a report to the Committee on Foreign Relations of the Senate, the Committee on Appropriations of the Senate, the Committee on Foreign Affairs of the House of Representatives, and the Committee on Appropriations of the House of Representatives the unfunded priorities of the programs under the jurisdiction of the Secretary or the Administrator, as applicable.

(c) ELEMENTS.—

(1) IN GENERAL.—Each report submitted to Congress pursuant to subsection (b) shall include, with respect to each unfunded priority covered by such report—

(A) a summary description of such priority, including the objectives to be achieved if such priority is funded (whether in whole or in part);

(B) the additional amount of funds recommended to be made available to achieve the objectives referred to in subparagraph (A); and

(C) budget information with respect to such priority, including—

(i) the appropriation account;

(ii) the expenditure center; and

(iii) the project and, if applicable, any subprojects.

(2) PRIORITIZATION.—Each report submitted to Congress pursuant to subsection (b) shall present the unfunded priorities covered by such report in overall order of urgency of priority among unfunded priorities.

(a) FINDINGS.—Congress makes the following findings:

(1) The People’s Republic of China is the world’s second largest economy and a major global lender.

(2) In the third quarter of 2022, the foreign exchange reserves of the People’s Republic of China totaled more than $3,000,000,000,000.

(3) The World Bank classifies the People's Republic of China as a country with an upper-middle-income economy.

(4) On February 25, 2021, President Xi Jinping announced "complete victory" over extreme poverty in the People's Republic of China.

(5) The Government of the People's Republic of China utilizes state resources to create and promote the Asian Infrastructure Investment Bank, the New Development Bank, and the Belt and Road Initiative.

(6) The People's Republic of China is the world's largest official creditor.

(7) Through a multilateral development bank, countries are eligible to borrow until they can manage long-term development and access to capital markets without financial resources from the bank.

(8) The World Bank reviews the graduation of a country from eligibility to borrow from the International Bank for Reconstruction and Development once the country reaches the graduation discussion income, which is equivalent to the gross national income. For fiscal year 2023, the graduation discussion income is a gross national income per capita exceeding $7,455.

(9) Many of the other multilateral development banks, such as the Asian Development Bank, use the gross national income per capita benchmark used by the International Bank for Reconstruction and Development to trigger the graduation process.

(10) The People's Republic of China exceeded the graduation discussion income threshold in 2016.

(11) Since 2016, the International Bank for Reconstruction and Development has approved projects totaling $9,610,000,000 to the People's Republic of China.

(12) Since 2016, the Asian Development Bank has continued to approve loans and technical assistance to the People's Republic of China totaling more than $10,600,000,000. The Bank has also approved non-sovereign commitments in the People's Republic of China totaling more than $2,400,000,000 since 2016.

(13) The World Bank calculates the People's Republic of China's 2019 gross national income per capita as $10,390.

(b) Statement Of Policy.—It is the policy of the United States to oppose any additional lending from the multilateral development banks, including the International Bank for

Reconstruction and Development and the Asian Development Bank, to the People's Republic of China as a result of the People's Republic of China's successful graduation from the eligibility requirements for assistance from those banks.

(c) OPPOSITION TO LENDING TO PEOPLE'S REPUBLIC OF CHINA.—The Secretary of the Treasury shall instruct the United States Executive Director at each multilateral development bank to use the voice, vote, and influence of the United States—

(1) to oppose any loan or extension of financial or technical assistance by the bank to the People's Republic of China; and

(2) to end lending and assistance to countries that exceed the graduation discussion income of the bank.

(d) REPORT REQUIRED.—Not later than one year after the date of the enactment of this Act, and annually thereafter, the Secretary of the Treasury shall submit to the appropriate congressional committees a report that includes—

(1) an assessment of the status of borrowing by the People's Republic of China from each multilateral development bank;

(2) a description of voting power, shares, and representation by the People's Republic of China at each such bank;

(3) a list of countries that have exceeded the graduation discussion income at each such bank;

(4) a list of countries that have graduated from eligibility for assistance from each such bank; and

(5) a full description of the efforts taken by the United States to graduate countries from such eligibility once they exceed the graduation discussion income at each such bank.

(e) DEFINITIONS.—In this section:

(1) APPROPRIATE CONGRESSIONAL COMMITTEES.—The term "appropriate congressional committees" means—

(A) the Committee on Foreign Relations of the Senate; and

(B) the Committee on Financial Services and the Committee on Foreign Affairs of the House of Representatives.

(2) MULTILATERAL DEVELOPMENT BANKS.—The term "multilateral development banks" has the meaning given that term in section 1701(c) of the International Financial Institutions Act (22 U.S.C. 262r(c)).

To respond to the looming global food crisis precipitated by Russia's invasion of Ukraine.

IN THE SENATE OF THE UNITED STATES

FEBRUARY 15, 2023

Mr. RISCH (for himself and Mr. COONS) introduced the following bill; which was read twice and referred to the Committee on Foreign Relations

---

A BILL

To respond to the looming global food crisis precipitated by Russia's invasion of Ukraine.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLES.

This Act may be cited as the “Securing Allies Food in Emergencies Act” or the “SAFE Act”.

SEC. 2. STATEMENT OF POLICY.

It is the policy of the United States to respond to the looming global food crisis precipitated by the Russian Federation’s brutal, illegal invasion of Ukraine beginning in February 2022, which threatens to destabilize key partners and allies and push millions of people into hunger and poverty, particularly in areas of Africa and the Middle East that are already experiencing emergency levels of food insecurity, by taking immediate action to improve the timeliness and expand the reach of United States international food assistance.

SEC. 3. STRATEGY TO AVERT A GLOBAL FOOD CRISIS.

(a) STRATEGY REQUIREMENT.—Not later than 30 days after the date of the enactment of this Act, the Administrator of the United States Agency for International Development, acting in the capacity of the President's Special Coordinator for International Disaster Assistance pursuant to section 493 of the Foreign Assistance Act of 1961 (22 U.S.C. 2292b), shall develop and submit a strategy to the Committee on Foreign Relations of the Senate and Committee on Foreign Affairs of the House of Representatives for averting a catastrophic global food security crisis, particularly in areas of Africa and the Middle East that are already experiencing emergency levels of food insecurity, which has been driven by sharp increases in global prices for staple agricultural commodities, agricultural inputs (including fertilizer), and associated energy costs.

(b) CONSIDERATIONS.—In developing the strategy under subsection (a), the Administrator shall consider and incorporate an analysis of—

(1) the impact of the Russian Federation's brutal, illegal war in Ukraine on the cost and availability of staple agricultural commodities and inputs, including fertilizer—

(A) globally;

(B) in countries that rely upon commercial imports of such commodities and inputs from Ukraine or Russia; and

(C) in countries that are supported through the United Nations World Food Programme, which heavily relies upon purchases of wheat and pulses from Ukraine and has recently reported a price increase of more than $23,000,000 per month for its wheat purchases;

(2) the correlation between rising food costs and social unrest in areas of strategic importance to the United States, including countries and regions that experienced food riots during the 2007 to 2008 global food price crisis;

(3) the underlying drivers of food insecurity in areas experiencing emergency levels of hunger, including current barriers to food security development programs and humanitarian assistance;

(4) existing United States foreign assistance authorities, programs, and resources that could help avert a catastrophic global food crisis;

(5) recommendations to enhance the efficiency, improve the timeliness, and expand the reach of United States international food assistance programs and resources referred to in paragraph (4);

(6) opportunities to bolster coordination, catalyze and leverage actions by other donors and through multilateral development banks;

(7) opportunities to better synchronize assistance through well-coordinated development and humanitarian assistance programs within the United States Agency for International Development and alongside other donors;

(8) opportunities to improve supply chain and shipping logistics efficiencies in close collaboration with the private sector;

(9) opportunities for increased cooperation with the Department of State to strengthen diplomatic efforts to resolve global conflicts and overcome barriers to access for life-saving assistance;

(10) opportunities to support continued agricultural production in Ukraine, and the extent to which food produced in Ukraine can be used to meet humanitarian needs locally, regionally, or in countries historically reliant upon imports from Ukraine or Russia; and

(11) opportunities to support and leverage agricultural production in countries and regions currently supported by United States international agricultural development programs, including programs authorized under the Global Food Security Act of 2016 (22 U.S.C. 9301 et seq.), in a manner that—

(A) fills critical gaps in the global supply of emergency food aid commodities;

(B) enables purchases from small holder farmers by the United Nations World Food Programme;

(C) enhances resilience to food price shocks;

(D) promotes self-reliance; and

(E) opens opportunities for United States agricultural trade and investment.

SEC. 4. EMERGENCY AUTHORITIES TO EXPAND THE TIMELINESS AND REACH OF UNITED STATES INTERNATIONAL FOOD ASSISTANCE.

(a) IN GENERAL.—Subject to the provisions of this section and notwithstanding any other provision of law, the Administrator of the United States Agency for International Development is authorized to procure life-saving food aid commodities, including commodities available locally and regionally, for the provision of emergency food

assistance to the most vulnerable populations in countries and areas experiencing acute food insecurity that has been exacerbated by rising food prices, particularly in countries and areas historically dependent upon imports of wheat and other staple commodities from Ukraine and Russia.

(b) PRIORITIZATION.—

(1) IN GENERAL.—In responding to crises in which emergency food aid commodities are unavailable locally or regionally, or in which the provision of locally or regionally procured agricultural commodities would be unsafe, impractical, or inappropriate, the Administrator should prioritize procurements of United States agricultural commodities, including when exercising authorities under section 491 of the Foreign Assistance Act of 1961 (22 U.S.C. 2292).

(2) LOCAL OR REGIONAL PROCUREMENTS.—In making local or regional procurements of food aid commodities pursuant to subsection (a), the Administrator, to the extent practicable and appropriate, should prioritize procurements from areas supported through the international agricultural development programs authorized under the Global Food Security Act of 2016 (22 U.S.C. 9301 et seq.) and from Ukraine, for the purpose of promoting economic stability, resilience to price shocks, and early recovery from such shocks in such areas.

(c) DO NO HARM.—In making local or regional procurements of food aid commodities pursuant to subsection (a), the Administrator shall first conduct market assessments to ensure that such procurements—

(1) will not displace United States agricultural trade and investment; and

(2) will not cause or exacerbate shortages, or otherwise harm local markets, for such commodities within the countries of origin.

(d) EMERGENCY EXCEPTIONS.—

(1) IN GENERAL.—Commodities procured pursuant to subsection (b) shall be excluded from calculations of gross tonnage for purposes of determining compliance with section 55305(b) of title 46, United States Code.

(2) CONFORMING AMENDMENT.—Section 55305(b) of title 46, United States Code, is amended by striking “shall” and inserting “should”.

(e) EXCLUSIONS.—The authority under subsection (a) shall not apply to procurements from—

(1) the Russian Federation;

(2) the People's Republic of China; or

(3) any country subject to sanctions under—

(A) section 620A of the Foreign Assistance Act of 1961 (22 U.S.C. 2371);

(B) section 40 of the Arms Export Control Act (22 U.S.C. 2780); or

(C) section 1754(c) of the Export Control Reform Act of 2018 (50 U.S.C. 4813(c)).

S. 1698

To require group health plans and group or individual health insurance coverage to provide coverage for over-the-counter contraceptives.

IN THE SENATE OF THE UNITED STATES

MAY 18, 2023

Mrs. MURRAY (for herself, Ms. HIRONO, Ms. CORTEZ MASTO, Mr. BLUMENTHAL, Mrs. SHAHEEN, Mr. REED, Mr. SCHATZ, Mr. PADILLA, Mr. MERKLEY, Ms. WARREN, Mr. CARPER, Ms. BALDWIN, Mr. MURPHY, Mr. SANDERS, Ms. CANTWELL, Ms. STABENOW, Ms. DUCKWORTH, Mr. WHITEHOUSE, Mr. WELCH, Ms. SMITH, Mr. FETTERMAN, Mr. MENENDEZ, Mr. BENNET, Ms. HASSAN, Mr. BOOKER, Mr. KAINE, Mr. HEINRICH, Mr. VAN HOLLEN, and Ms. KLOBUCHAR) introduced the following bill; which was read twice and referred to the Committee on Health, Education, Labor, and Pensions

---

A BILL

To require group health plans and group or individual health insurance coverage to provide coverage for over-the-counter contraceptives.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Short title.

This Act may be cited as the "Affordability is Access Act of 2023".

SEC. 2. Purpose.

The purpose of this Act is to ensure timely access to affordable birth control by requiring coverage without cost-sharing for contraceptives that are approved, granted, or cleared by, or

otherwise legally marketed under regulation by, the Food and Drug Administration for use without a prescription.

SEC. 3. Findings.

The Senate finds the following:

(1) Birth control is critical health care that almost all women, as well as many trans men and nonbinary people, will use at some point in their lifetimes.

(2) Access to the full range of reproductive health care, including birth control coverage as guaranteed under Federal law, provides individuals with the opportunity to lead healthy lives and get the care they need to reach their goals.

(3) Contraceptive access is associated with health benefits for women, newborns, families, and communities and can lower the risk of harm to maternal and infant health.

(4) An estimated 73 million women of reproductive age (ages 15 through 49) live in the United States. Among the 46 million of such women who are sexually active and not seeking children, 89 percent use a form of birth control.

(5) The birth control benefit enacted under the Patient Protection and Affordable Care Act (Public Law 111–148) has been a crucial step forward in advancing access to birth control and has helped ensure 58 million women have the power to decide for themselves if and when to become pregnant.

(6) Despite legal requirements for birth control coverage and access to services, gaps remain for millions of individuals. Nearly 1 in 5 women are not using their preferred method of contraception, and of those women, a quarter say it is because of cost. As a result, many women have gone without the birth control they want to use, also creating inconsistent use. Access to birth control is particularly difficult for the 19 million women of reproductive age with lower incomes who live in contraceptive deserts and lack reasonable access to a health center that offers the full range of contraceptive methods.

(7) Due to systemic discrimination, people paid low wages, people of color, LGBTQ+ individuals, immigrants, and people with disabilities are more likely to face barriers to, and lack access to, health coverage and health care providers.

(8) There are numerous social and economic factors that make it harder to access birth control, including rising income and wealth inequality, gaps in insurance coverage, and barriers to accessing health providers.

(9) Leading health experts support over-the-counter birth control pills.

SEC. 4. Sense of the Senate.

It is the sense of the Senate that—

(1) in order to increase access to oral birth control, such birth control must be both easier to obtain and affordable and, to make such birth control either easier to obtain or more affordable, but not both, is to leave unacceptable barriers in place;

(2) it is imperative that the entities that research and develop oral birth control and whose medical and scientific experts have developed clinical and other evidence that oral birth control for routine, daily use is safe and effective when sold without a prescription, apply to the Food and Drug Administration for review and approval for sale of such birth control without a prescription;

(3) upon the receipt of such an application, the Food and Drug Administration should determine whether the oral birth control meets the rigorous safety, efficacy, and quality standards for over-the-counter use under the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 301 et seq.), and if the product meets those standards, the Food and Drug Administration should approve the application without delay; and

(4) if and when the Food and Drug Administration approves an oral birth control that is available over-the-counter, such birth control should be covered by health insurance, without a prescription and without cost-sharing.

SEC. 5. Clarifying coverage requirements.

The Secretaries of Health and Human Services, Labor, and the Treasury shall clarify that coverage of contraceptives pursuant to section 2713(a)(4) of the Public Health Service Act (42 U.S.C. 300gg–13(a)(4)) includes coverage of over-the-counter contraceptives approved, granted, or cleared by the Food and Drug Administration, even if the enrollee does not have a prescription for the contraceptive.

SEC. 6. Rules of construction.

(a) NON-INTERFERENCE WITH FDA REGULATION.—Nothing in this Act shall be construed to modify or interfere with Food and Drug Administration processes to review or approve, or otherwise determine the safety and efficacy of, and make available, non-prescription drugs or devices, modify or interfere with the scientific and medical considerations of the Food and Drug Administration, or alter any other authority of the Food and Drug Administration.

(b) NON-PREEMPTION.—Nothing in this Act preempts any provision of Federal or State law to the extent that such Federal or State law provides protections for consumers that are greater than the protections provided for in this Act.

SEC. 7. Duties of retailers to ensure access to contraception for use without a prescription.

(a) IN GENERAL.—Any retailer that stocks contraception that is approved, granted, or cleared by, or otherwise legally marketed under regulation by, the Food and Drug Administration for use without a prescription may not interfere with an individual's access to or purchase of such contraception or access to medically accurate, comprehensive information about such contraception.

(b) LIMITATION.—Nothing in this section shall prohibit a retailer that stocks over-the-counter contraceptive products from refusing to provide an individual with such contraceptive product that is approved, granted, or cleared by, or otherwise legally marketed under regulation by, the Food and Drug Administration if the individual is unable to pay for the contraceptive product, directly, through insurance coverage, or through other payment mechanisms

To provide for the consideration of a definition of antisemitism set forth by the International Holocaust Remembrance Alliance for the enforcement of Federal antidiscrimination laws concerning education programs or activities, and for other purposes.

IN THE SENATE OF THE UNITED STATES

APRIL 16, 2024

Mr. SCOTT of South Carolina (for himself, Mr. CASEY, Mr. LANKFORD, Ms. ROSEN, Mr. SCOTT of Florida, Mr. WYDEN, Mr. MORAN, Mr. BENNET, Mr. BOOZMAN, Ms. CORTEZ MASTO, Ms. COLLINS, Mr. COONS, Mr. CRAPO, Ms. SINEMA, Mr. GRASSLEY, Mrs. GILLIBRAND, Mr. HAWLEY, Mr. HICKENLOOPER, Mrs. BRITT, Mr. BLUMENTHAL, Mr. RICKETTS, Mr. FETTERMAN, Mr. BARRASSO, Mr. CARDIN, Mr. COTTON, Mr. MANCHIN, Mr. CORNYN, Ms. HASSAN, Mrs. CAPITO, and Ms. CANTWELL) introduced the following bill; which was read twice and referred to the Committee on Health, Education, Labor, and Pensions

A BILL

To provide for the consideration of a definition of antisemitism set forth by the International Holocaust Remembrance Alliance for the enforcement of Federal antidiscrimination laws concerning education programs or activities, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Short title.

This Act may be cited as the "Antisemitism Awareness Act of 2024".

SEC. 2. Sense of Congress.

It is the sense of Congress that—

(1) title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.), prohibits discrimination on the basis of race, color, and national origin in programs and activities receiving Federal financial assistance;

(2) while such title does not cover discrimination based solely on religion, individuals who face discrimination based on actual or perceived shared ancestry or ethnic characteristics do not lose protection under such title for also being members of a group that share a common religion;

(3) discrimination against Jews may give rise to a violation of such title when the discrimination is based on race, color, or national origin, which can include discrimination based on actual or perceived shared ancestry or ethnic characteristics;

(4) it is the policy of the United States to enforce such title against prohibited forms of discrimination rooted in antisemitism as vigorously as against all other forms of discrimination prohibited by such title; and

(5) as noted in the U.S. National Strategy to Counter Antisemitism issued by the White House on May 25, 2023, it is critical to—

(A) increase awareness and understanding of antisemitism, including its threat to America;

(B) improve safety and security for Jewish communities;

(C) reverse the normalization of antisemitism and counter antisemitic discrimination; and

(D) expand communication and collaboration between communities.

SEC. 3. Findings.

Congress finds the following:

(1) Antisemitism is on the rise in the United States and is impacting Jewish students in K–12 schools, colleges, and universities.

(2) The International Holocaust Remembrance Alliance (referred to in this Act as the "IHRA") Working Definition of Antisemitism is a vital tool which helps individuals understand and identify the various manifestations of antisemitism.

(3) On December 11, 2019, Executive Order 13899 extended protections against discrimination under the Civil Rights Act of 1964 to individuals subjected to antisemitism on college and university campuses and tasked Federal agencies to consider the IHRA Working Definition of Antisemitism when enforcing title VI of such Act.

(4) Since 2018, the Department of Education has used the IHRA Working Definition of Antisemitism when investigating violations of that title VI.

(5) The White House released the first-ever United States National Strategy to Counter Antisemitism on May 25, 2023, making clear that the fight against this hate is a national, bipartisan priority that must be successfully conducted through a whole-of-government-and-society approach.

SEC. 4. Definitions.

For purposes of this Act, the term "definition of antisemitism"—

(1) means the definition of antisemitism adopted on May 26, 2016, by the IHRA, of which the United States is a member, which definition has been adopted by the Department of State; and

(2) includes the "[c]ontemporary examples of antisemitism" identified in the IHRA definition.

SEC. 5. Rule of construction for title VI of the Civil Rights Act of 1964.

In reviewing, investigating, or deciding whether there has been a violation of title VI of the Civil Rights Act of 1964 (42 U.S.C. 2000d et seq.) on the basis of race, color, or national origin, based on an individual's actual or perceived shared Jewish ancestry or Jewish ethnic characteristics, the Department of Education shall take into consideration the definition of antisemitism as part of the Department's assessment of whether the practice was motivated by antisemitic intent.

SEC. 6. Other rules of construction.

(a) GENERAL RULE OF CONSTRUCTION.—Nothing in this Act shall be construed—

(1) to expand the authority of the Secretary of Education;

(2) to alter the standards pursuant to which the Department of Education makes a determination that harassing conduct amounts to actionable discrimination; or

(3) to diminish or infringe upon the rights protected under any other provision of law that is in effect as of the date of enactment of this Act.

(b) CONSTITUTIONAL PROTECTIONS.—Nothing in this Act shall be construed to diminish or infringe upon any right protected under the First Amendment to the Constitution of the United States.

To require the Administrator of the Drug Enforcement Administration to temporarily exempt buprenorphine from the Suspicious Orders Report System for the remainder of the opioid public health emergency.

IN THE SENATE OF THE UNITED STATES

SEPTEMBER 25, 2024

Mr. HEINRICH introduced the following bill; which was read twice and referred to the Committee on the Judiciary

---

A BILL

To require the Administrator of the Drug Enforcement Administration to temporarily exempt buprenorphine from the Suspicious Orders Report System for the remainder of the opioid public health emergency.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the ‘‘Broadening Utilization of Proven and Effective Treatment for Recovery Act’’ or the ‘‘BUPE for Recovery Act’’.

SEC. 2. REMOVAL OF BUPRENORPHINE PRODUCTS FROM SORS DURING OPIOID PUBLIC HEALTH EMERGENCY.

(a) TEMPORARY EXEMPTION.—The Administrator of the Drug Enforcement Administration shall temporarily exempt any buprenorphine product approved for the treatment of opioid use disorder from the Suspicious Orders Report System established under 312 of the Controlled Substances Act (21 U.S.C. 832), including subsection (a)(3) of that section, until that date that is 270 days after the date on which the public health emergency with respect to opioids declared by the Secretary of Health and Human Services pursuant to section 319 of the Public Health Service Act (42 U.S.C. 247d) on October 26, 2017, expires.

(b) REPORT.—Not later than 90 days after the date of the expiration of the public health emergency described in subsection (a), the Department of Justice and the Department of Health and Human Services shall—

(1) conduct a comprehensive report that indicates if the temporary exemption under subsection

(a) resulted in increased access to buprenorphine treatment for patients experiencing opioid use disorder; and
(2) make a recommendation to the White House and Congress about whether buprenorphine should remain in the Suspicious Orders Report System and be subject to related reporting requirements after the expiration of the public health emergency described in subsection (a).

(c) SENSE OF CONGRESS.—It is the sense of Congress that Congress is concerned by reports of patients not being able to fill buprenorphine prescriptions for the treatment of opioid use disorder at pharmacies. Reports indicate that pharmacies are unable or unwilling to stock sufficient buprenorphine products, in part because of the Suspicious Orders Report System and related reporting requirements. A temporary exemption of buprenorphine products approved for the treatment of opioid use disorder from Suspicious Order Report System requirements would allow the Federal Government to collect relevant data and assess whether a permanent exemption should be established.
